

# SECORIM<sup>®</sup> ABO Columns

## Selective Extracorporeal Immunoabsorbers

- © Specific removal of incompatible ABO antibodies in connection with organ transplantation
- © Easy handling
- © E-beam sterilized
- © DEHP free

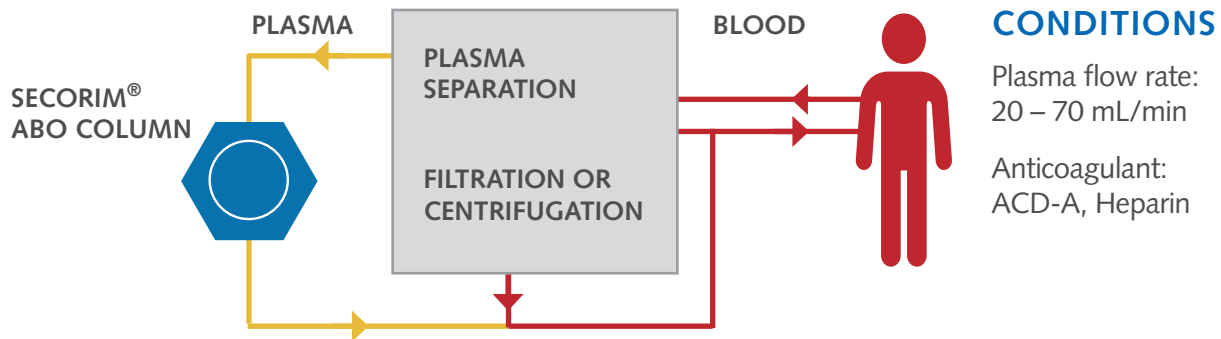

### FEATURES

SECORIM<sup>®</sup> ABO columns facilitate ABO-incompatible transplantations through reduction of blood group A or/and B antibodies.

The specific removal of antibodies by SECORIM<sup>®</sup> ABO column prohibit several side effects & retains many valuable physiological plasma components. Therefore, SECORIM<sup>®</sup> ABO column offers substantial advantage compared to other methods.

## Scheme of Treatment

### CONDITIONS

Plasma flow rate:  
20 – 70 mL/min

Anticoagulant:  
ACD-A, Heparin

## Blood Group Barriers Elimination

SECORIM<sup>®</sup> ABO Columns together with protocol for ABO-incompatible transplantation eliminates blood group barriers

Donor blood group	Recipient blood group	Immunoadsorption Column
A	O or B	SECORIM <sup>®</sup> ABO A-column
B	O or A	SECORIM <sup>®</sup> ABO B-column
AB	A	SECORIM <sup>®</sup> ABO B-column
AB	B	SECORIM <sup>®</sup> ABO A-column
AB	O	SECORIM <sup>®</sup> ABO AB-column

## Specifications

- Column volume 70 mL; Priming volume 34 mL; Net weight 230 g.
- Dimensions: Length: 60 mm, Outer diameter: 90 mm.
- Connectors: Male and Female Luer Lock connectors.
- Materials: Case/Housing: Polycarbonate; Filter material: Polyethylene.
- Adsorption (matrix): Polymethacrylate. Tubing: PVC (DEHP-free)
- Active component: Oligosaccharides.
- Storage temperature: +5°C to +25°C; Shelf life: 1 year.
