

## FitBark 2 Dog Activity Monitor

A **motivational** platform that gets dogs and humans healthy together while providing unprecedented insights into dog activity, sleep, behavior and overall **health**.

### Track activity, sleep and behavior

Monitor activity levels, quality of sleep, distance traveled, calorie burn and overall health 24/7.

### Set an ideal health goal vs. similar dogs

Select a lifestyle based on dogs of similar age, weight and breed.

### Catch early signs of illness / discomfort

Health index and sleep score typically decrease for pups who are getting sick or in discomfort.

### Monitor a variety of medical issues

Watch how separation anxiety, osteoarthritis, dermatitis, ACL rehabilitation etc. change over time.

### Get peace of mind when apart

See what Fido's day looks like so you can get peace of mind at work or even when you travel.

### Monitor progress together

Link your Fitbit, Apple Watch, HealthKit or Google Fit device and monitor progress side by side.

### Challenge dogs and humans

Get other pups and humans on the same leaderboards and engage in weekly and monthly challenges.

### Discover new friends

Meet other dogs that share a similar age, weight, breed, lifestyle or location.

# Specifications

## Sensor

3-axis accelerometer

## Dimensions

1.6 x 1.1 x 0.5 inches (41 x 28 x 13.5 mm)

## Outputs

Activity counts (BarkPoints)  
Rest / Active / Play time  
Distance traveled (miles or km)
