Please look at the table below and note any of the things that apply to your permit.

If...	then..
you plan to keep your records at a site other than where the activity takes place	you need to let us know within 20 working days of receiving this letter.
your permit includes pre-operational or improvement conditions	check the deadlines for completing measures and make sure you carry them out by the times stated. Note: from the 1st October 2018, additional charges apply for assessments or approvals under these conditions. The exception is for new waste incinerator or co-incinerator permits

Table continues on next page.

If...	then..

Subsistence charges

Most permits attract a subsistence charge for each full or part financial year they are in force.

The exceptions are:

If...	then..
your permit is only for mobile plant	there is no subsistence charge, instead we will charge for each deployment. This does not apply to some mobile plant permits that allow the spreading of wastes on land. In these cases both subsistence and deployment charges apply.
construction work or operation of your facility has yet to start	no subsistence charge is due until activities begin. This does not apply to waste incineration or co-incineration plant, where a fixed pre-construction charge applies.

If a subsistence charge is due, your first invoice will be for a pro rata amount. This amount will be based on the date of permit transfer until the end of the financial year.

You can find further information on charging, including when additional charges apply in our charging scheme:

and charging guidance:
