

HOSES
FOR ALMOST ANY USE

WILLBRANDT's VALUES & MISSION

Mission

To be ahead of the development and offer our customers new and innovative solutions.

To be a trustworthy partner for our customers and suppliers and thereby ensuring exclusive possibilities.

To do our utmost to find the best possible solution.

To use our knowledge to add value to our customers products and operating environment.

To secure our customers products:

- Against vibration and shock
- Against expansions and contractions
- For optimal flow of medias
- Against noise, dust and moisture
- Against unnecessary wear and tear

Vision

It is our target to offer overall solutions to our customers, and thereby assist in deliverance of the best possible solution.

It is our ambition to understand our customers demands and expectations and offer quality solutions according to applicable standards and regulations.

We will help our suppliers develop and share our ambition of continuous process improvement and high quality.

We will be CO2 neutral in 2035.

We will act according to UN world goals where applicable.

We aim for continuous economic strength, stability and being a solid working partner as well as workplace.

Values

Our employees are our most valuable active. They are chosen due to their professional and personal qualifications and are further educated and trained on a continuous basis.

We are proud of our knowledge and will always do our utmost to find the best solution.

We work across professions and country borders to find the best solution for our customers. We do not compromise quality.

GET A PERFECT FIT WITH HOSES FROM WILLBRANDT

WILLBRANDT delivers a wide range of handmade hoses in dimensions from DN 20 up to DN 600. Our hoses are particularly suitable for industry such as food, medicine, maritime, energy and railway as well as for the military and navy. We supply our hoses ready for use in adapted lengths and equipped with couplings, sleeves or fully molded flange ends.

The hoses can be used for the passage of refrigerant, air, oil, lime, sand and gravel as well as many other medias. We trade hoses from Continental's series including brands such as ContiTech, Merlett, Phoenix Trix and Blaudieck. These hoses are characterized by a high level of safety, quality and longevity, thereby minimizing the cost of maintenance and inspection.

INDUSTRY

We deliver industrial hoses that are designed for a wide variety of industrial and commercial applications.

We collaborate with several top-quality suppliers producing high quality hoses with precise extruding and product-specific braiding technologies and vulcanization processes.

Consequently, we supply a wide range of hoses for diverse applications, ranging from hoses for sweepers to hoses for large industrial plants.

For special applications, we develop the ideal hose designed to meet exact requirements such as temperature resistance, pressure, robustness and flexibility.

MARITIME AND OFFSHORE

Whatever the challenges you are facing, we have the capability and expertise to offer specialist hose solutions.

Whether you require modifications to existing hose designs or the development of completely new hose designs, we can help you.

MINING AND GRAVEL PITS

We deliver innovative hoses and intelligent systems that make use of rubber, plastic and combinations of materials such as metals, fabrics, textiles, glass and electronic components.

Drawing on our extensive development and

materials expertise, we combine our products and systems with customized services.

We partner with our customers to create added value and help make the social trends of tomorrow a reality today.

RAILWAY

With a broad range of high-quality railway hoses, we help making passenger and cargo transport by rail safer and more convenient. Our railway hoses are made of high-quality compounds in line with the latest engineering principles and in compliance with national and international standards.

Our hoses meet fire protection requirements and have an impressive reliability, safety and durability record as well as being extremely flexible and are easy to handle. As a supplier to the railway industry, we provide tailor-made solutions according to customer requirements.

HOSES FOR THE POWER PACK

Due to vibration and movements at various points on the train during operation it is not possible to have rigid connections, particularly at the engine frame/power pack.

- Moulded and bended hoses as flexible connections for pipes

To solve this issue, we supply:

- Hoses for cooling, air, hydraulic and air intake (turbo)

Determined by the use of the application, different qualities and materials can be used for the inner tube and outer covering for the hoses.

FOOD AND BEVERAGE

Food and beverage hoses are primarily used to transport edible dry food and drinkable (potable) liquids in industrial food- and beverage-processing applications.

Our hoses for the food and beverage industry are subject to stringent hygiene regulations and numerous standards.

CONTINENTAL MERLETT

We supply Continental's industrial hoses designed for a wide variety of industrial and commercial applications.

Continental is now also leader in the production of thermoplastic flexible hoses established in most markets for agriculture, general industry, transports, nautical, building and food industries.

STANDARD SILICONE HOSES

Unless otherwise stated, our standard reinforced silicone rubber hoses have 3 plies of polyester reinforcement. This applies to all hoses up to an internal diameter of 50 mm. For larger diameter hoses we use 4 plies of the same reinforcement

material to provide higher pressure resistance.

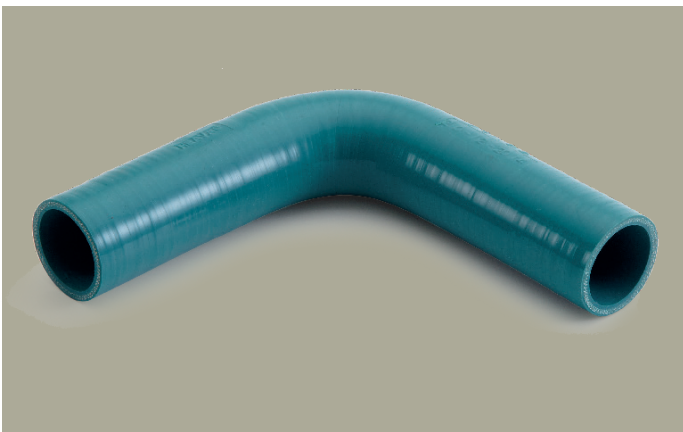

Our reinforced silicone hoses undergo extensive physical, chemical and dynamic tests to perfectly match different industry needs.

Elbow hoses

Our elbow hoses come in 45, 90 and 180 degree angle and with an inside diameter of 16, 22, 28, 32, 35, 38, 45, 48, 57, 63, 70 or 76 mm and in many different lengths.

Elbow hoses with reduction and transition

Our elbow hoses with reduction and transition between different sizes, comes with an inside diameter of 16, 22, 28, 32, 35, 38, 45, 48, 57, 63, 70 or 76 mm and are available in many different lengths.

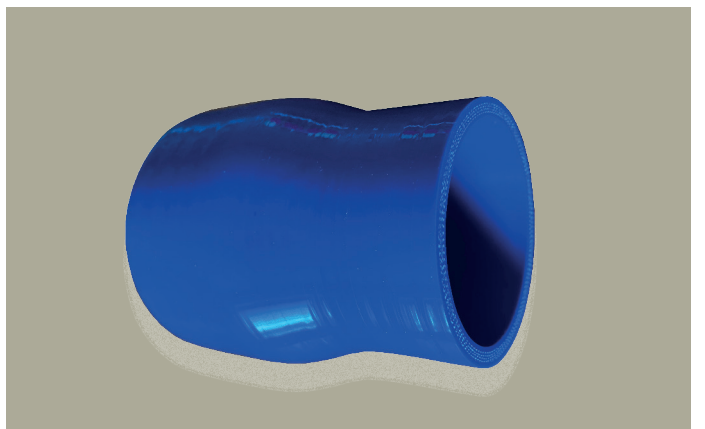

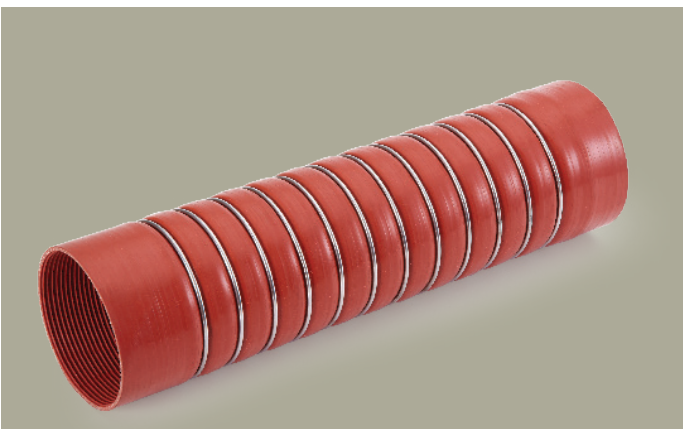

Straight hoses

We supply straight hoses in many different lengths and with an inside diameter of 16, 22, 28, 32, 35, 38, 45, 48, 57, 63, 70 or 76 mm.

Straight hoses with reduction and transition

Our straight hoses with reduction and transition between different sizes, come with an inside diameter of 16, 22, 28, 32, 35, 38, 45, 48, 57, 63, 70 or 76 mm and are available in many different lengths.

WILLBRANDT Gummitechnik A/S are experts within rubber and polyurethane products. We deliver dampers to reduction of oscillation, vibration and shock waves. Furthermore, we deliver expansion joints absorbing movements in piping systems. We focus on a holistic approach ensuring our customers products maintain their high quality.

It is our ambition to understand our customers' demands and expectations and offer quality solutions abiding with applicable standards and legislation.

We offer advice and guidance as part of our service and are always happy to assist our customers in getting the optimal solution.
