YOUNIQUE SE7EN

SE7EN

SEZEN

An aerial, top-down view of a sleek, white luxury yacht moving through deep blue water, leaving a white wake. The yacht's hull is transparent, revealing a sophisticated interior with multiple rows of plush, light-colored leather seating. The deck is finished with light-colored teak planking. At the stern, there is a helm station with a steering wheel and two seats. The overall design is modern and elegant, emphasizing luxury and comfort.

IMAGINATIVE AND OUT-OF-THE BOX THINKING

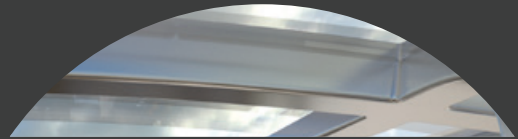

By thinking out-of-the box and using their imagination the designers and shipyard have come up with a limousine tender that celebrates the joy of being outdoors on the water and the pleasure of navigation. Of course, the 12-metre yacht is fast, safe and comfortable. But it is also spacious, exceptionally stylish and fabulously luxurious.

UNIQUE FEATURES

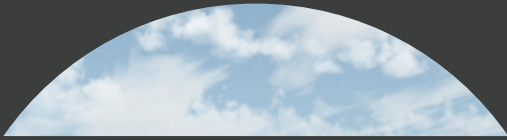

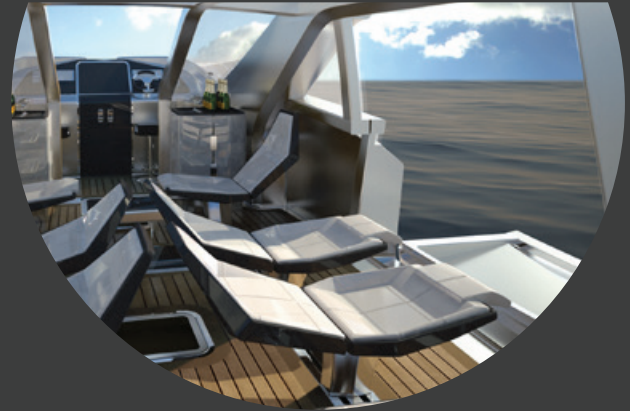

The Younique Seven offers a modular, customizable and spacious interior, with full standing height. Its custom-made seats, with integrated audio, sit in two recessed rails on both sides of the boat and can be rotated, reclined and removed easily. No unnecessary details clutter the interior or disturb the sleek design.

MODULAR ACCOMMODATION

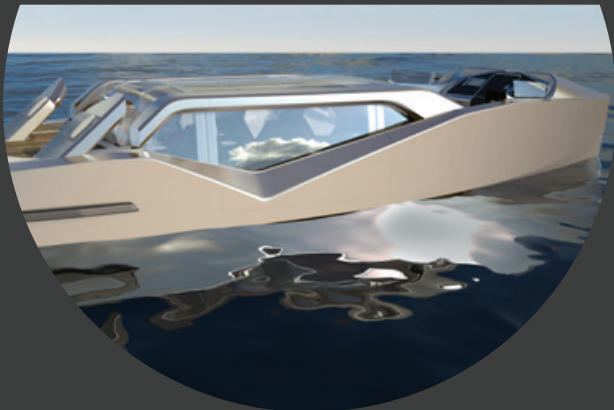

SUNBATHING LOUNGE AREA

RETRACTABLE LIMOUSINE ROOF

DIVING PLATFORMS

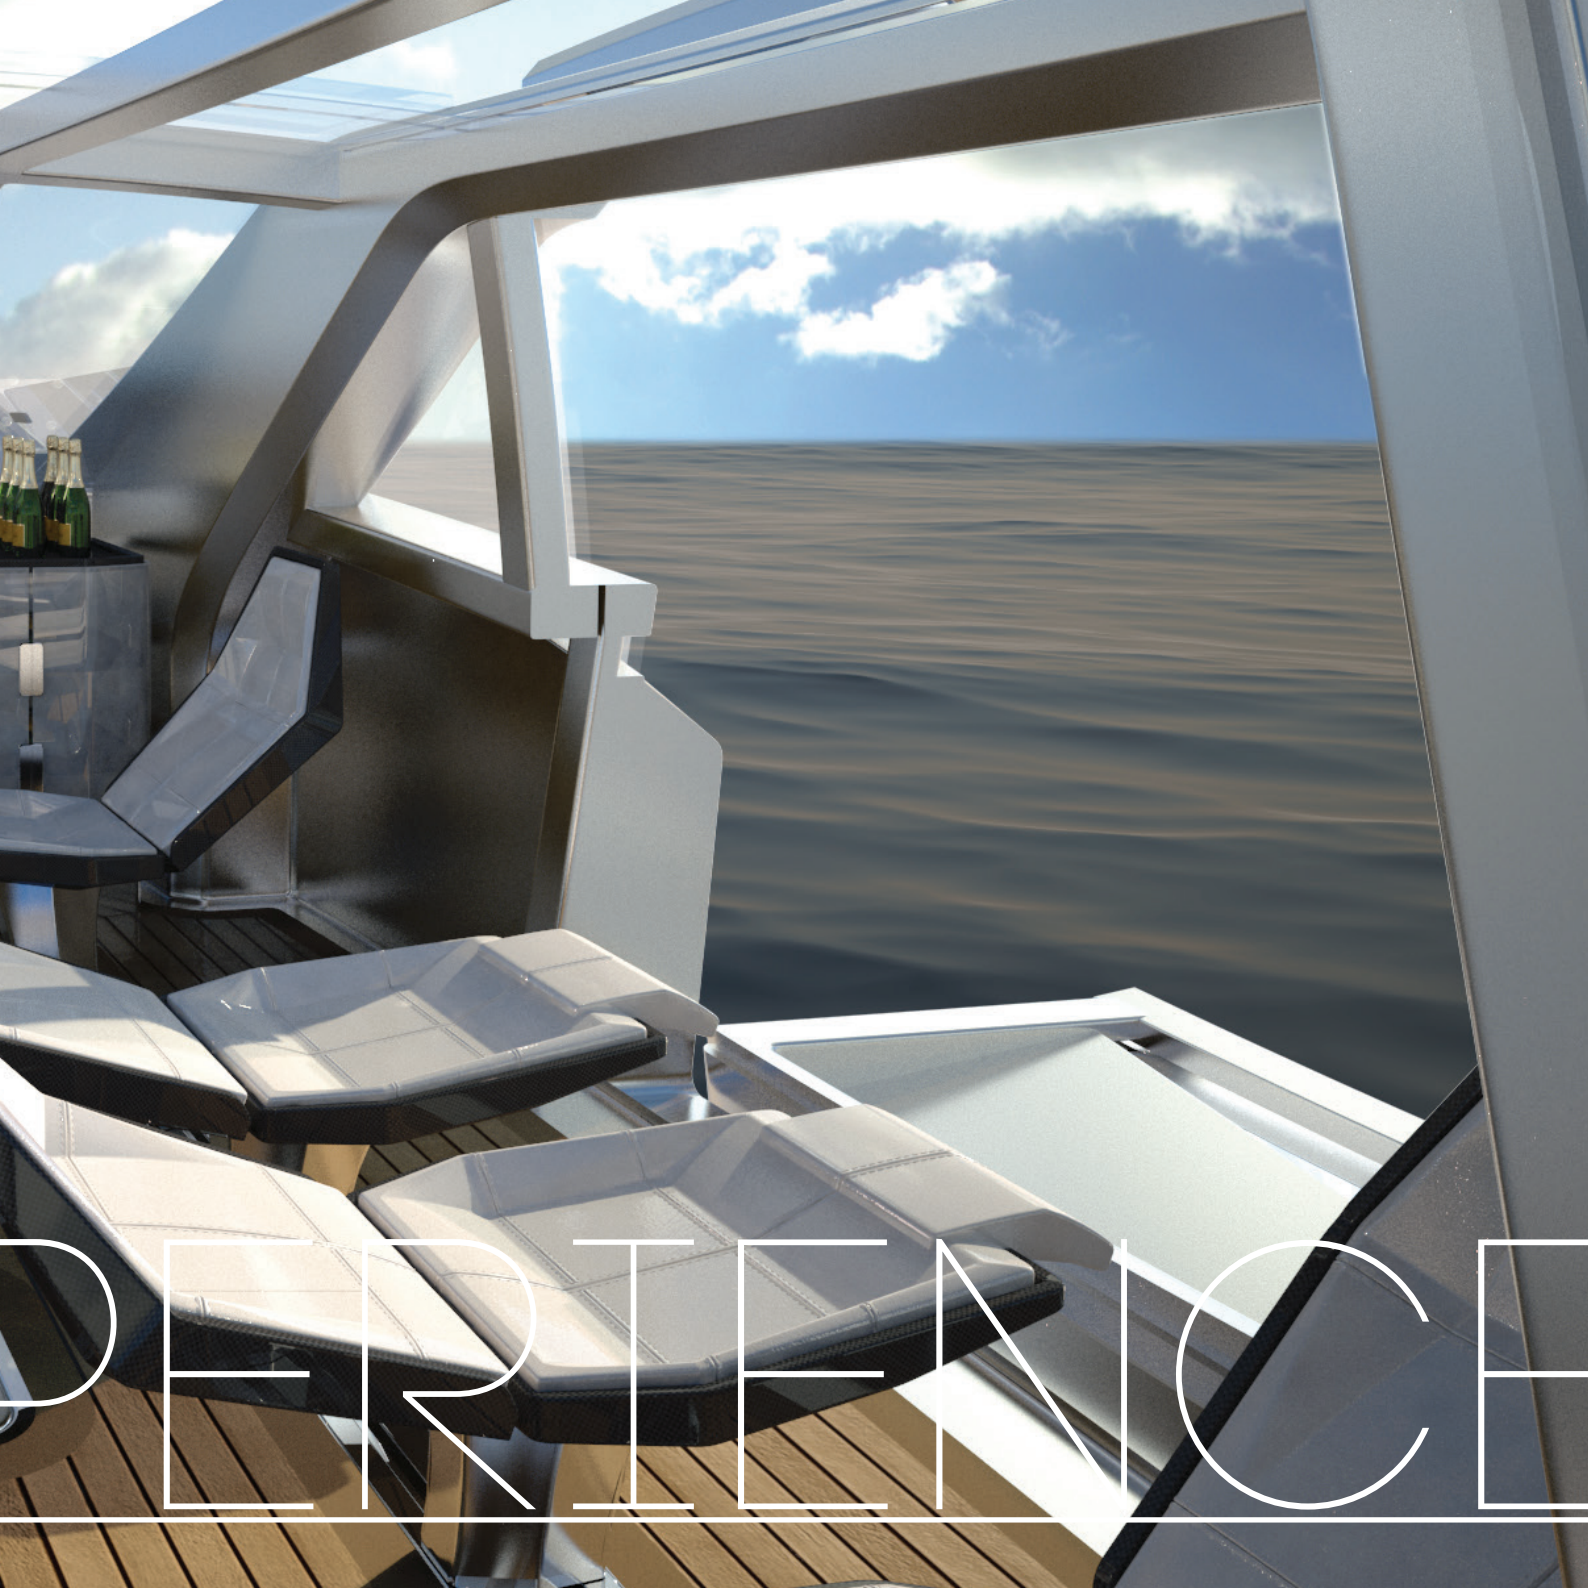

The image shows the interior of a luxury yacht, likely the 'Yunique Seven' mentioned in the text. The view is from the passenger area looking towards the helm station. In the foreground, there are several white lounge chairs with dark mesh backs. A central bar area features a black countertop with two green bottles and a glass. The helm station in the background has a steering wheel and various controls. The yacht has a sun roof and large windows, and the deck is made of teak planking. The overall atmosphere is one of modern luxury and comfort.

OWNER

Only the best materials are used to build the Yunique Seven, and its design is as beautiful as it is flexible. With the impressive sun roof, the folding doors on port and starboard that double as diving platforms and its comfortable lounge areas for relaxing in the sun, this limousine tender is an exceptional pleasure to spend time on.

It is not just a comfortable means of transportation. It also offers a wonderful opportunity to be close to the water and enjoy the ocean.

EXPERIENCE

PERFORMANCE

CAPTAIN AND CREW

Combining lightweight aluminium build, carbon fibre construction and advanced hull design, the tender runs smoothly at speed in any sea state and can carry 12 people comfortably.

A truly unique feature of the Yunique Seven is that its roof can be lowered to a height of 2100 mm - so that it fits in the tender store - while maintaining full standing height when it's open.

EXP

* HULL TESTED WITH FLUID DYNAMICS PROGRAMMING FOR OPTIMISED CRUISING CONDITIONS

* CAN CARRY 12 PERSONS COMFORTABLY

* ENGINE SET: 2 YANMAR 8LV370 WITH YANMAR STERNDRIVES

* MANOEUVRING: YANMAR JOYSTICK CONTROL

* INTERCEPTORS

* FLEXIBLE AND SAFE BOARDING

* ELECTRICALLY OPERATED DOORS AND HATCHES

* CUSTOM COCKPIT AND CONTROLS

* ROOF CAN BE LOWERED TO 2100MM, TO FIT IN TENDER STORE

* SEPARATE INSTALLATION AND EQUIPMENT AREA

EXTERIOR AND

...A constant striving to work with cutting edge ideas and technologies, yet with a deep understanding of how things were and are made, is what sets us apart from other designers.

Veronika Schmid was born and raised in Austria, Germany and the United States. She has worked as an architect for some well-known yacht design and architecture offices. In 2009 she moved to New York and established Impossible Productions Ink LLC with Alistair Gill. She has worked as a professor at some of the most prestigious architecture schools, such as the Architectural Association in London, Harvard University and RISD.

INTERIOR DESIGN

...nothing is impossible. we always strive for pushing the boundaries into the unimaginable, but always maintaining a classic elegance and sophistication.

Alistair Gill was born and raised in Great Britain. He worked for several yacht design and architecture offices for more than 15 years before he went to New York to establish Impossible Productions Ink LLC with Veronika Schmid. He has worked as a professor at prestigious architecture schools, including the Architectural Association in London and Columbia University (NYC).

ENGINEERING AND BUILD

...You have to deeply understand the essence of a product in order to be able to get rid of the parts that are not essential.

Younique Yachts seeks to understand the essence of what customers want, and then to use that information to design and build yachts. We are satisfied only when our yachts perform, look, feel and handle exactly the way our customers want them to.

Our approach requires great effort and attention to detail. Custom building is about what the owner wants. But we believe what the captain and crew want is just as important. After all, they will be the ones handling and maintaining the yacht for the owner.

FLUID DYNAMICS NAVAL ARCHITECTURE HULL VANE®

NAVAL ARCHITECTURE

...You want your yacht or ship to excel in performance, in terms of efficiency, safety and comfort. Van Oossanen can realize your dream

As a naval architect, I have to be a generalist, an integrator of all the various disciplines which come together in a Super Yacht. *Perry van Oossanen*

My CFD expertise allows me to visualise the flow around yachts. I take responsibility for all yachts up to 24m, from first sketch to final design. *Niels Moerke*
