MADE FOR WATER

*BORN FROM THE LOVE
OF BEING ON THE WATER*

OUR HISTORY

Zhik was founded in 2003, when founder Brian Connolly saw an opportunity in the sailing apparel market. For the Athens Olympics in 2004, there was a clear demand for more innovative and technical gear to help sailing athletes win gold.

The brand continued to develop a unique styling for gear and clothing for dinghy sailing. Since then, Zhik has been the preferred choice for top athletes. After the success with these elite professionals in several dinghy classes, Zhik saw a further opportunity to innovate and develop the yachting market.

Through extensive Research and Development efforts in constructions, fabrics and new materials, Zhik developed Isotak™ and AroShell™. The brands' focus is to design smart layers of technical fabric, to keep sailors, warm, dry and safe. Zhik has truly revolutionised inshore, coastal and offshore yachting gear that resulted in winning its first entry into the 2017-2018 Volvo Ocean Race with Dongfeng Race Team.

These days, the brand's reputation as 'Made for water' is also popular in other water sports like wind surfing, kite surfing, and paddle boarding.

A photograph of a sailboat deck, showing the mast, rigging, and a person on deck. The text 'THE OCEAN RACE' is visible on the side of the boat, along with a logo featuring a stylized wave or sail shape. The image is overlaid with a teal-to-red gradient.

YACHTING WEAR EXPLAINED

THE REAL SCIENCE BEHIND FABRIC TECHNOLOGY

SECTION .01

LAYERING UP

01 Baselayers

Baselayers are required to wick moisture away from the skin. During times of intense activity, the body sweats to effectively manage temperature. Once this activity ends there is a danger for clothing to be damp, as moist skin loses temperature far quicker than dry skin.

For this reason, it is important to have an efficient base layer to transport moisture away from the skin and towards the outer shell. Keeping dry is the key to staying warm.

02 Midlayers

The mid-layer is the primary layer for generating heat, this is important in cold conditions. Mid-layers should be optimized to trap dry, insulating air around the body while also expelling water vapour that has been transferred off the base layers. Insulation and breathability are the key for mid-layers.

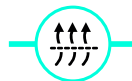

03 Outer Layers / Shells

Outer layers or shells are the main barrier to the elements. They must fully block external water and wind while also provide maximum breathability to expel all water vapour that has collected inside the garment. Waterproof shells are particularly challenging to meet the rigorous requirements of the marine environment. There are multiple options available to users to meet each requirement.

SECTION .02

BREATHABILITY

What is Breathability?

Movement of water vapor from an area of high temperature inside a garment, to areas of low temperature outside a garment is central to the theory of breathability.

The transfer of water vapor (sweat) from the inside of the garment to the outside is known as water vapour permeability. In order for an athlete to feel as dry as possible, shells need to be breathable.

Maximising breathability in a high performance garment is a delicate balance between breathability and long-lasting waterproofness. Various combinations of membrane materials, face fabrics and thicknesses result in optimized performance for different uses.

Our Membrane Types

Zhik only uses laminated membranes in their materials to maximise breathability and durability. Laminated membranes are far superior to coatings.

Microporous Membranes

These membranes contain microscopic holes that are large enough for water vapor gas to escape outside to cooler temperatures, but too small for water liquid droplets to pass through inside the garment. Microporous membranes traditionally have less resistance to water vapor escaping but in general are less durable than hydrophilic membranes.

Hydrophilic Membranes

Hydrophilic properties of these membrane materials are used to draw water from inside the high temperature environment via wicking to the cooler outside temperatures. Hydrophilic membranes generally are more durable than microporous membranes.

Bi-Component Membranes

Bi-component membranes physically combine membranes or coatings to further enhance certain characteristics of the material. The balance of this composite can improve the membrane's physical durability, waterproofness or resistance to contaminants. In certain combinations breathability can be enhanced compared to a singular component membrane.

Breathability Tests & Values

Breathability is measured by two tests, these different methods of testing are suited to the membrane properties.

WATER VAPOR PERMEABILITY TEST

Moisture Vapor Transmission Rate (MVTR value)

This method measures how many grams of steam per square meter of membrane surface [g / m²] escapes (penetrates) within 24 hours. The higher the MVTR, the higher the breathability.

Extremely Breathable: 15,000 - 30,000

Very Breathable: 10,000

Breathable: Above 3,000

Not Breathable: -

M
V
T
R

WATER STEAM CONTINUITY TEST

Resistance to Evaporating Heat Transfer (RET value)

This method measures the force / resistance that water vapor needs to pass through the textile being tested.

Extremely Breathable: 0-6

Very Breathable: 7-13

Breathable: 13-20

Not Breathable: >20

E
T

SECTION .03

WATERPROOFNESS

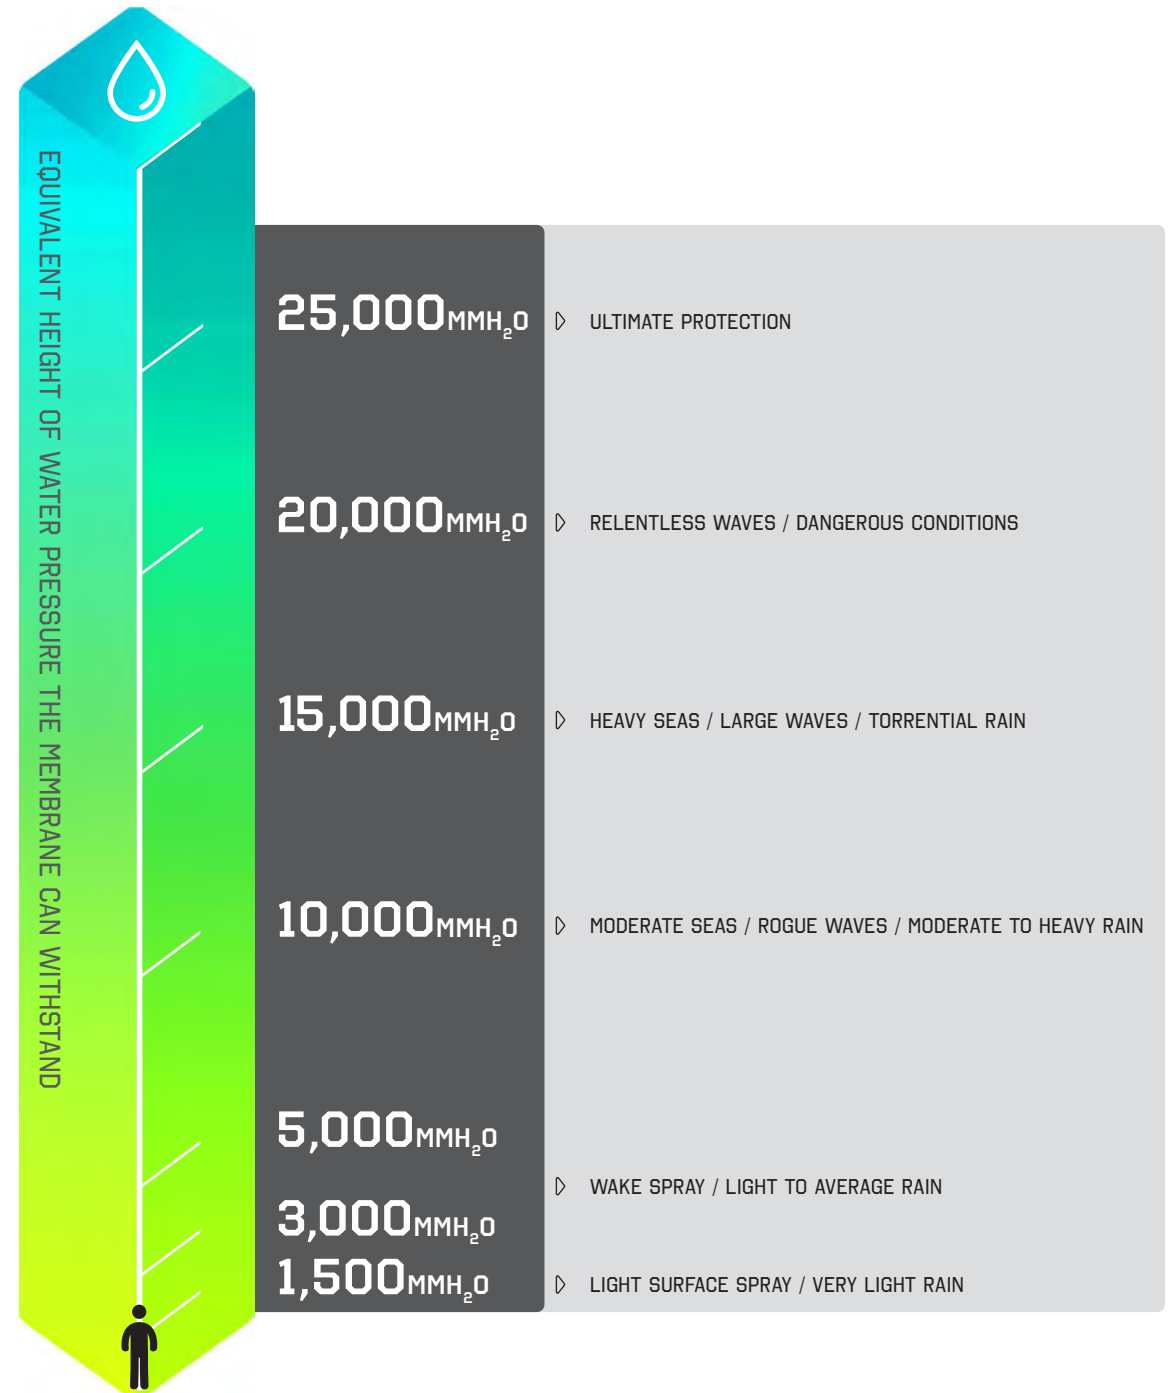

Testing Method

Traditionally, to indicate the waterproofness of technical fabrics, the water column test is used. This is now replicated with the use of a hydrostatic head machine, which applies the same pressure. The water column test is used to measure the pressure required before water pushes through the fabric and membrane. A cylinder ten centimetres in diameter is placed on top of the fabric to be tested and filled with water. It is observed for 24 hours until water pushes through the underside of the fabric. The level of water in the cylinder in millimetres that it took to cause water to push through the fabric is recorded as the water column reading (HH/mm). For example, a 30,000mm reading would equal a 30 meter water tower, in order for there to be enough pressure to penetrate the fabric.

The graph on the right is a general representation. >>

What is DWR?

Durable Water Repellency (DWR) is a treatment applied to the outer face of shells to make them water repellent. The addition of this technology to shells reduces outer-faces that are open to the elements taking in water weight and reduce wind chill effects.

What is Waterproof Durability?

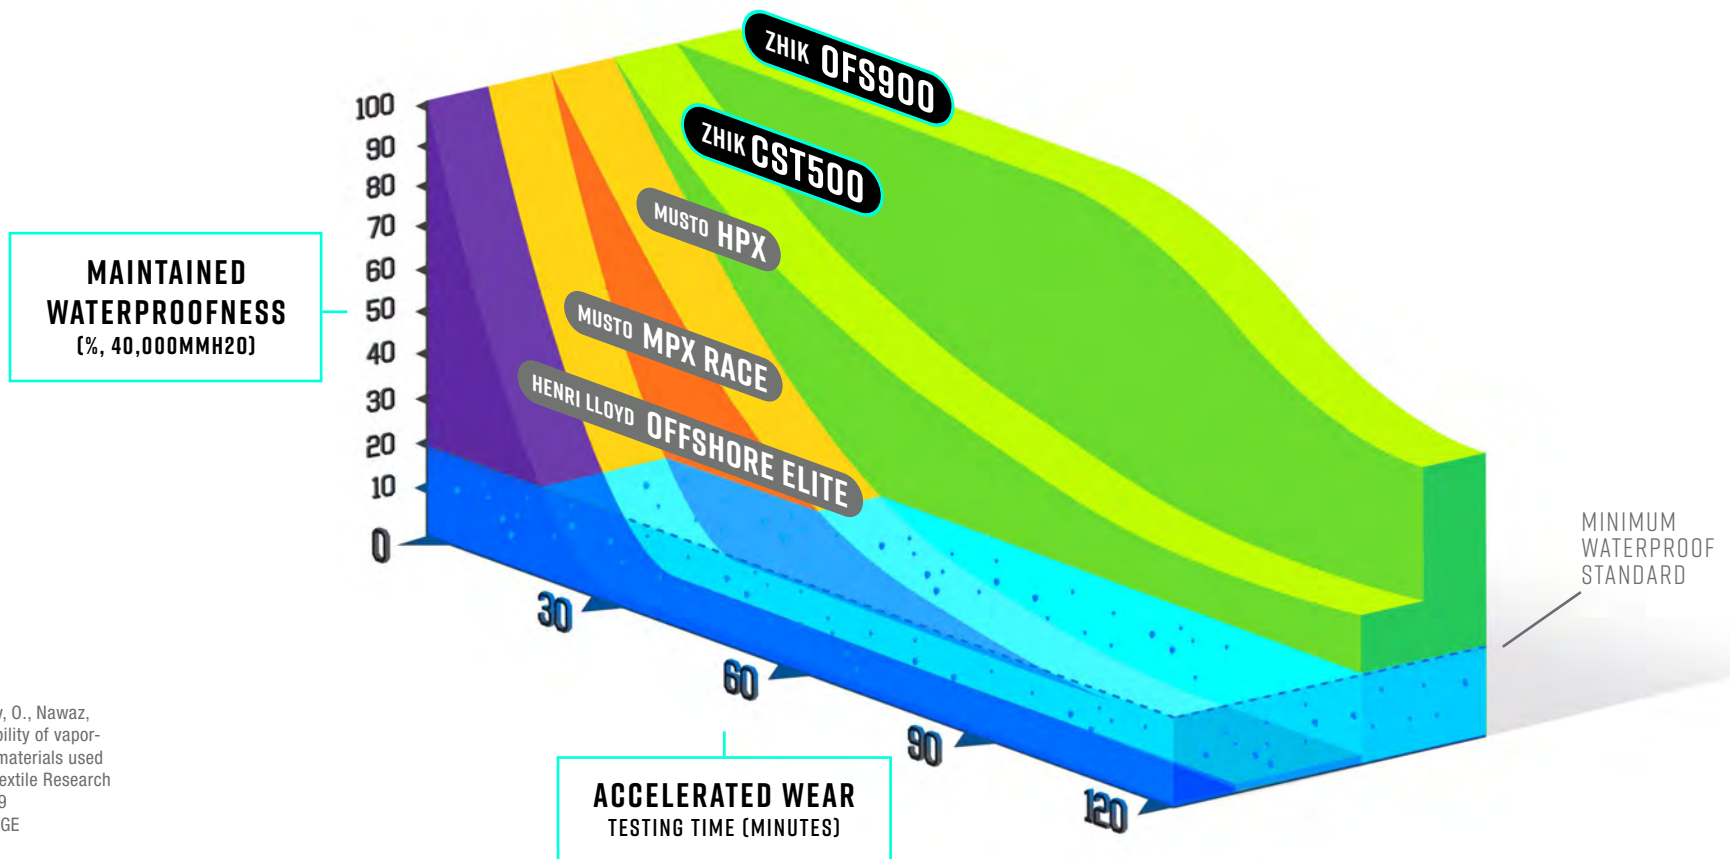

OUR **4X** CLAIM EXPLAINED

RMIT (Royal Melbourne Institute of Technology) have pioneered the development of a waterproof durability testing method specifically designed to simulate accelerated wear and tear in wet conditions (when the waterproof membrane is most vulnerable).

This method involves placing waterproof textiles in an accelerated wear device that simulates impact and abrasion in wet conditions. Each textile is pressure tested to determine the waterproofness after defined intervals of accelerated wear.

The chart below represents the hydrostatic resistance (Waterproofness) of each fabric after 30, 60, 90 and 120 minutes of accelerated wearing.

Through these tests Zhik® fabrics have been found to be substantially more waterproof durable than competitor fabrics. Which means they will keep you dry and protected for longer before showing signs of leakage.

i Graph adopted from: Troynikov, O., Nawaz, N. and Watson C., 2017. Durability of vapor-permeable waterproof textile materials used in sailing protective apparel. Textile Research Journal, p.0040517517732079 Reprinted by Permission of SAGE Publications, Ltd.

OUR SHELL PERFORMANCE GUIDE

The following tables offers a general performance overview of our 2022 shell ranges.

ACTIVITY	PRODUCT	AREA OF APPLICATION	MATERIAL	WATERPROOF DURABILITY	WATERPROOF FIGURE	BREATHING ACTIVITY	BREATHABILITY FIGURE
OCEAN / OFFSHORE	OFS900	Extreme protection for the highest professional ocean and offshore use.	Breathable, bicomponent microporous & hydrophilic 4-layer laminate with Isotak® Technology membrane.	 10	> 30,000mm	 7	RET 6-13 m2 Pa/W
	OFS800	High performance product for offshore and coastal racing and cruising.	Highly breathable, eVent® Direct Diffusion™ EV Protective bicomponent membrane.	 7	> 24,000mm	 10	RET <5 m2 Pa/W
	OFS700	Built specifically for offshore and coastal racing and cruising.	Hydrophilic, breathable 2-layer laminate with Apex Technology PU membrane.	 4	> 15,000mm	 5	MVTR > 10,000 g/m2 / 24h
PERFORMANCE COASTAL	CST500	The most breathable and lightweight coastal performance gear on the market.	Hydrophilic, extremely breathable 3-layer laminate with Aroshell Technology PU membrane.	 7	> 15,000mm	 9	MVTR > 15,000 g/m2 / 24h
INSHORE	INS200	Highly waterproof and breathable garments for moderate to high activity coastal, inshore and inland sailing.	Hydrophilic, breathable 3-layer laminate with Vecta Technology TPU membrane.	 7	> 10,000mm	 5	MVTR > 10,000 g/m2 / 24h
INSHORE, CHARTER, MOTORBOAT & LEISURE	INS100	Waterproof and breathable jackets to protect for life on and off the water.	Hydrophilic, breathable 2-layer laminate with Vecta Technology TPU membrane.	 4	> 5,000mm	 3	MVTR > 3,000 g/m2 / 24h

KEY	Very Low	Medium	Very High	Extreme
				

SECTION .04

FABRIC LAYERS

2L 

Two Layer

- ▶ A woven face textile with a laminated membrane on the inside face to provide waterproof and breathable protection.
- ▶ An internal garment lining protects the membrane, making it more durable and comfortable to wear.

3L 

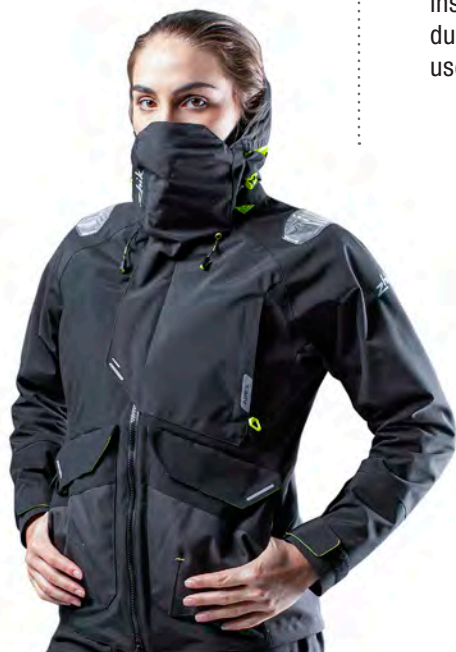

Three Layer

- ▶ A woven face textile with a laminated membrane on the inside.
- ▶ The membrane layer is the last level of waterproof protection while also providing breathability.
- ▶ Lightweight scrim layer is then laminated to the inside face of the membrane, providing additional durability to the membrane and comfort for the user.

4L 

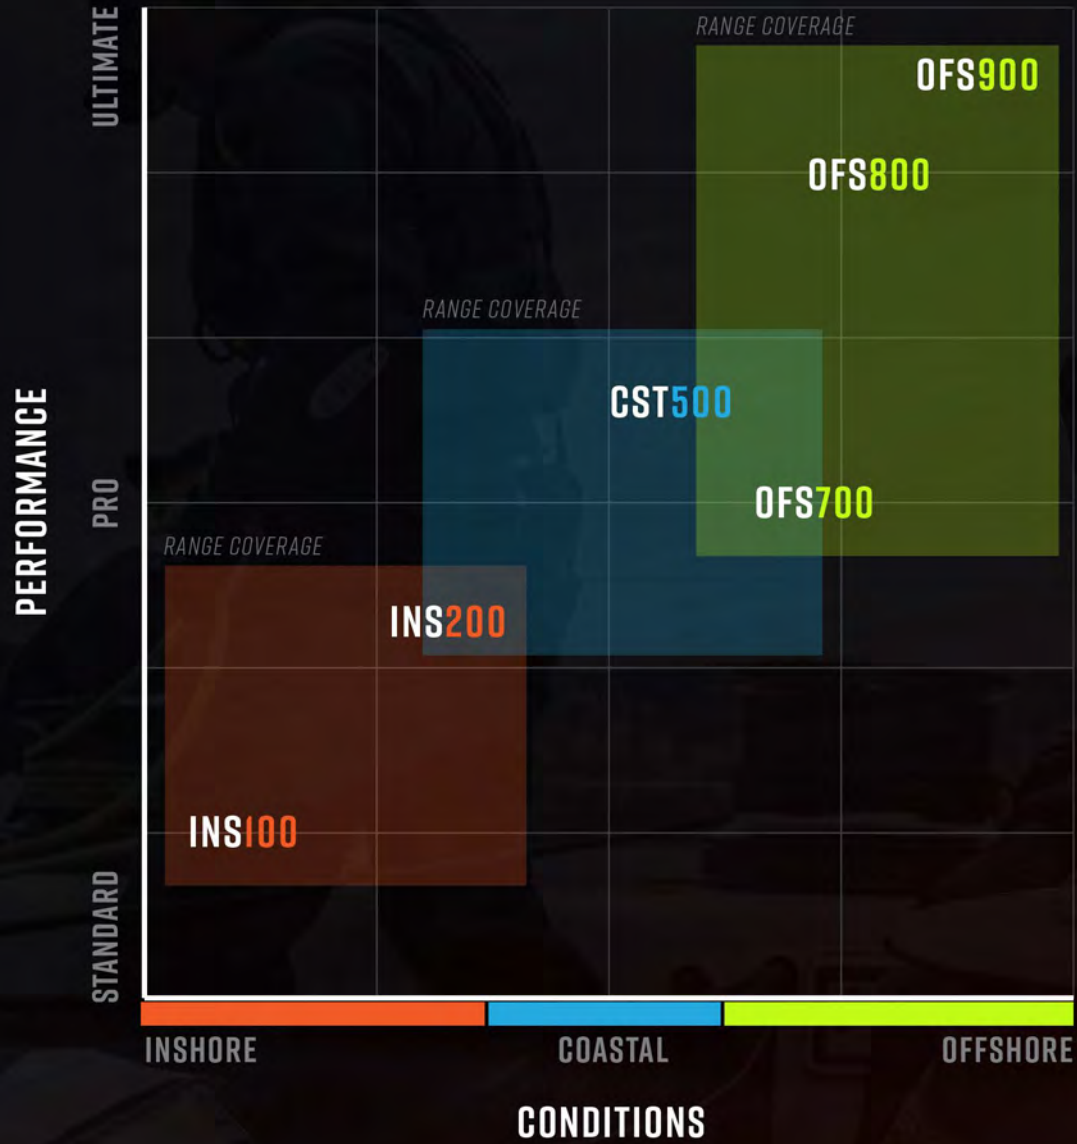

Four Layer

- ▶ A woven face textile with a composite-laminated membrane on the inside.
- ▶ The dual-membrane layer is the last level of waterproof protection while also providing breathability. This membrane functions by drawing moisture away from the user while efficiently expelling water vapour.
- ▶ Lightweight scrim layer is then laminated to the inside face of the membrane, providing additional durability to the membrane and comfort for the user.

OFS

EXTREME CONDITIONS AND RACING ON THE EDGE CALL FOR OUTER WEAR TESTED TO THE HIGHEST STANDARDS, ON THE WATER AND IN THE LAB.

OFS900™ OCEAN WET WEATHER GEAR

The OFS900™ range featuring Isotak® X Fabric Technology represents the pinnacle of protection required by professional Ocean racers. The multi-layer Isotak® X Technology membrane creates a fabric with unrivaled levels of waterproof durability. Very high breathability and numerous proprietary features round this range out to provide the very best in extreme weather protection and top-level performance.

FEATURES

ALL ITEMS

- ▶ Zhik Multilayer composite membrane and QuLock® seam sealing for 4X more waterproof durability.
- ▶ Highly durable & waterproof YKK® Aquaguard® zippers throughout with Aquaseal® main zipper on Jacket. 1
- ▶ Multiple pockets in key locations for easy access & storage of important belongings.
- ▶ Reflexite reflectors provide high visibility in low light conditions. 2
- ▶ 1000D Cordura® reinforcement in knee & rear panels protects high wear areas. 3
- ▶ Bio-motion reflectors strategically placed on garment allow easy recognition of body movement at night.

SMOCK & JACKET

- ▶ Hydrovison® Visor is an anti-fogging and rigid visor that gives unparalleled 110° vision. 4
- ▶ Advanced Reziseals® provide super soft & durable composite seal design in wrists and neck. 5
- ▶ Hydrobase® lining in side pockets, collar and faceshield provides fast drying warmth and comfort. 6
- ▶ PFD compatible quick stow hood lets you raise & lower hood quickly with one hand.
- ▶ Inner neoprene waist skirt to prevent water flushes.

SMOCK

- ▶ Adaptive Hood system gives you versatility to remove and replace the hood with other options for different conditions. 7

JACKET

- ▶ Dual zipper entry system with easy relief zipper.

SALOPETTE

- ▶ Lightweight removable inner knee and seat pads for comfort, protection & insulation.
- ▶ Adjustable Velcro® shoulder straps provide low profile comfort with no loose ends. 8

▷ EXTREME PROTECTION FOR THE HIGHEST PROFESSIONAL OCEAN AND OFFSHORE USE ◁

THE ALL NEW OFS800™ OFFSHORE RANGE

The OFS800™ Offshore Range has been developed and refined with the world's leading offshore sailors, built to meet the high demand of serious offshore sailing. The design journey began with our Volvo Ocean Race collaboration with Team Akzonobel and winners Dongfeng Race Team. This 2-year development is the culmination of material science, functional Industrial design and thousands of nautical miles of athlete testing.

A combination of laboratory and real-world testing derived the eVent® technology as the product that provided the perfect balance of waterproofness, durability and breathability required for Offshore sailing.

Extreme breathability is provided by a unique composite of eVent® membrane technology, with the ability to dynamically regulate temperature through fast moisture evaporation. Used by military institutions world-wide, this material technology from is not only extremely breathable, but incredibly robust, ensuring the garment is durable enough withstand the rigours of offshore sailing at the highest level and provide extended waterproofness across the usable life of the garment.

Novel features are ergonomically and functionally designed for the offshore environment. With particular focus on providing complete protection from the elements and uninhibited maneuverability, these ensure unrivaled comfort for offshore environments.

EVENT FABRICS - A NEW PARTNERSHIP

A NEW WATERPROOF FABRIC

The eVent® Difference

The critical difference between eVent® technology and traditional breathable waterproof fabrics is the Direct Diffusion technology with millions of microscopic pores built into the proprietary membrane that instantly begin venting water vapour (sweat) that builds up inside your gear during activity.

This technology utilises a unique composite of materials to provide unrivaled breathability. Unlike other technologies, it doesn't need to get wet to work. It is a 'dry system' that allows eVent® fabrics to be fully waterproof and fully breathable – keeping you dry and comfortable in the widest range of temperatures and conditions.

eVent
FABRICS

The Protective Membrane

eVent® protective membranes and laminates use bi-component Direct Diffusion Technology to outfit militaries, police, firefighters and other professionals with outerwear and footwear that meets the most demanding waterproof, breathable, chemical and fire-resistant specifications.

It is also the perfect choice for the demands of Ocean Sailing, providing the waterproof durability needed for extended periods on the water and the high breathability required to keep you comfortable during peak activity loads.

The Fabric Stats

eVent® fabrics have been extensively tested in the lab, and the results speak for themselves.

Durable Water Repellence (DWR)

DWR Performance: AATCC 22-2010 Rating

DWR Durability: (80 / 20)

High performing industry certified DWR provides the first barrier prevent water saturation to the outer layers, improving overall wind and water resistance.

Breathability

RET performance: ISO 11092

RET: <5 m²Pa/W

More than 60% more breathable than its predecessor, with an RET of less than 4 the fabric expels heat and moisture regulating your body temperature during high activity.

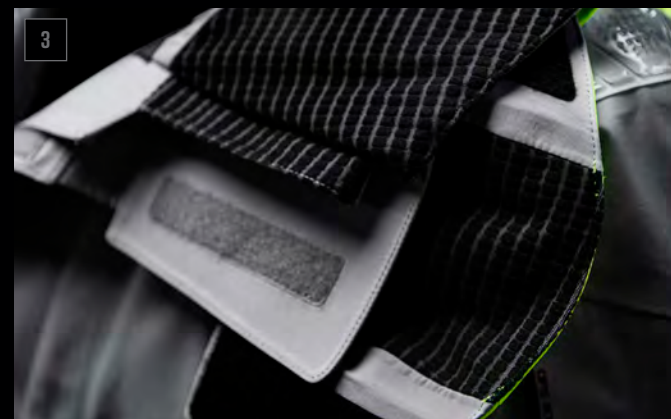

Waterproofness

Hydrostatic pressure test: ISO 811

Performance: 24,000mm H₂O

Continuous and lasting waterproofness of 25,000mm that will keep you dry, no matter the conditions.

OFS800™ OFFSHORE WET WEATHER GEAR

FEATURES

JACKET

- ▶ High Offshore Collar and face shield lined with Zhik Hydrobase® fast drying fleece. 2 3
- ▶ 180° Hydrovision™ Visor for a wide uninhibited viewing zone. 1
- ▶ Head-lock hood design with a wind and water gusset and 3-point adjustment system.
- ▶ 500D Abrasion resistant rear panelling for increased durability. Central YKK® Vislon® anti-corrosion zipper.
- ▶ Adjustable face shield with 8cm of movement to get the perfect coverage for your face. 5
- ▶ Photoluminescent (glow-in-the-dark) Reflexite® reflectors. 8
- ▶ Large dual utility pockets.
- ▶ Centralised chest pocket access for when wearing a life jacket.
- ▶ Quick access and fast drying handwarmer pockets.
- ▶ Quick access arm pocket for essentials.
- ▶ Articulated arm panelling for an ergonomic fit.
- ▶ Abrasive resistant zipper placket for protection against the wire.
- ▶ Dual width external Storm flap for reduced bulk and greater flexibility.
- ▶ Ergonomic outer wrist closures and flexible watertight neoprene inner seals. 9
- ▶ Heavy duty rear hang loop.

SMOCK

- ▶ High Offshore Collar and face shield lined with Zhik Hydrobase® fast drying fleece. 2 3

OFS700™

OFFSHORE WET WEATHER GEAR

The OFS700™ range featuring Apex Fabric technology, delivers highly durable gear for offshore and coastal sailing. This highly breathable and durable waterproof 2-layer shell will shield you when the conditions turn bad. Fully seam-taped and critically reinforced for ultimate protection, this is the perfect range for offshore racing and cruising.

FEATURES

ALL ITEMS

- ▶ 2-Layer Apex material technology utilises a rugged Hydrophilic PU membrane designed for a variety of sailing conditions.
- ▶ Fully seam taped, with all critical junctions further reinforced to provide maximum waterproof protection.
- ▶ 80/20 Durable Water Repellency (DWR).

JACKET

- ▶ Sized to allow additional layers to be worn underneath.
- ▶ Features two large utility pockets, chest pocket and fleece lined hand warmers. 1
- ▶ Adjustable hood with quick stow away pocket. 2
- ▶ High Ocean cut collar with an integrated and fold down faceshield. 3
- ▶ Highly durable YKK® Aquaguard® Water resistant zippers. 4
- ▶ Reflexite® shoulder, wrist and hood reflectors. 5
- ▶ Reinforced rear panel to protect against wear. 6
- ▶ Lightweight soft mesh lining for increased airflow & comfort. 7
- ▶ Double sealed arm cuffs, with Internal PU cuffs for double waterproof protection. 8
- ▶ External D-Ring.

SALOPETTE

- ▶ Soft internal mesh maximises airflow in warmer conditions and provides and conducts warmth in cold conditions.
- ▶ Reinforced knee, crotch, Seat and leg cuff panels feature a 500 Denier abrasive material.
- ▶ Adjustable leg openings with an ergonomic tightening method that distributes pressure evenly up the ankle. Reducing pressure and creating a tighter seal.
- ▶ Double headed centre front zipper with a large gusset for easy internal access while remaining waterproof.
- ▶ Highly durable YKK® Vislon® zippers.
- ▶ Soft mesh suspenders provide maximum comfort and airflow for days of continuous use.
- ▶ Zhik's signature 'Set & Forget' velcro strap adjustments are streamlined and low bulk.
- ▶ Easy access cargo pocket constructed with our abrasive resistant fabric for protection against tools and blades.
- ▶ Quick adjust elastic waist webbing for a tailored fit and comfort around waist.

COASTAL

CST | EXTREME CONDITIONS AND RACING ON THE EDGE CALL FOR OUTER WEAR TESTED TO THE HIGHEST STANDARDS, ON THE WATER AND IN THE LAB.

ALL-ROUND PERFORMANCE, DELIVERED. DEVELOPED FOR HIGH-INTENSITY INSHORE AND COASTAL RACING, THE PERFORMANCE COASTAL COLLECTION REDEFINES THE STANDARDS FOR WEIGHT AND BREATHABILITY.

CST500™

COASTAL WET WEATHER GEAR

The CST500™ range featuring highly breathable and durable Aroshell® fabric technology, paired with numerous weight-saving and comfort providing features, enable this range to provide protection and performance in a wide range of conditions. Equally as comfortable in short-haul overnight crossings and it is in high performance sports boat racing.

Fully seam-taped and critically reinforced for ultimate protection, this innovative range is purpose built for coastal racing and cruising, while also providing genuine crossover coverage for other conditions.

New Zithane® fused reinforcement panels have replaced the traditional heavy denier reinforcements, creating a highly durable reinforced panel that maintains seam integrity and provides large reductions in weight. Developed and tested with Team Akzonobel during the 2017 – 18 Volvo Ocean Race, Zithane® technology provided additional layers of durability during extreme legs of the race.

MATERIAL INFO

Hydrophilic, breathable 3-layer laminate with PU membrane.

All Items:

Shell: 100% Polyester / Membrane: 100% Polyurethane

INSHORE

INS

COMFORT, DURABILITY AND FUNCTION ARE WHAT ZHIK'S INSHORE LINE OF TECHNICAL OUTER WEAR ARE ALL ABOUT.

INS200™

INSHORE & CRUISING WET WEATHER GEAR

The INS200™ range featuring Vecta Fabric Technology, has all the features required for high activity coastal and inshore sailing, encased in a streamlined design. Features are maximised without adding bulk, retaining a simplified form that moves with the body. INS200™ provides performance, protection and comfort on the water or in wild weather, and easily transitions to the street.

FEATURES

ALL ITEMS

- ▶ 3-Layer Vecta fabric technology; waterproof, lightweight, breathable TPU membrane designed for inshore sailing.
- ▶ All seams are taped with critical junctions further reinforced. [1](#)
- ▶ 80/20 Durable Water Repellency (DWR).
- ▶ Laser cut water drainage.

JACKET

- ▶ Adjustable cuffs with a fused PU lining to provide a comfortable seal that will protect against water ingress. [2](#)
- ▶ Sculpted minimalist fit maximises comfort and the waterproofness of the garment.
- ▶ Streamlined hood design conforms to the head, provides unrivalled protection from wind and water. [3](#)
- ▶ Expandable yet minimal chest pocket. [4](#)
- ▶ Internal pocket for extra protection.
- ▶ Darted pockets for maximum utility without bulk. [5](#)

SALOPETTE

- ▶ Easy access cargo pocket constructed with abrasion resistant material for protection against tools and blades.
- ▶ Adjustable elastic suspenders provide maximum comfort for days of continuous use. Can easily be set up for a perfect fit.
- ▶ Pre-formed waist provides a secure fit without the need for a tightening system. [6](#)
- ▶ 500D abrasion panelling reinforced knee, crotch and rear panels. [7](#)
- ▶ Double headed zippered centre front with a large gusset for easy internal access and waterproofness.
- ▶ Adjustable leg openings with an ergonomic tightening method that distributes pressure evenly up the ankle. Reducing pressure and creating a tighter seal.

PANT

- ▶ Elastic PU Coated lower leg seals to immediately provide a water-resistant seal.
- ▶ Tapered cut and fit.
- ▶ High back panel to protect the rear lumbar from wind and water ingress.
- ▶ Elastic waist for a quick and comfortable fit.
- ▶ Zippered fly with waterproofing gusset.
- ▶ 450 Denier abrasion panelling on seat and knee panels for additional abrasion resistance.
- ▶ Secured zipper pockets.
- ▶ Internal hang loop.

SHORT

- ▶ Reinforced seat and pockets with 450D Nylon Oxford.
- ▶ Two articulated 3D, zippered cargo pockets with laser cut drainage.
- ▶ Shaped waistband for ultimate fit.
- ▶ Plastic snap-lock fastening.
- ▶ Oversized belt loops to resist snagging.

MIDLAYERS & BASELAYERS

STAYING WARM IS KEY IN ANY MARINE ENVIRONMENT, MIDLAYERS & BASELAYERS ARE THE PROVIDER OF THIS WARMTH AND INSULATION IN THE 3-LAYER CLOTHING SYSTEM. MAXIMUM WARMTH AND MINIMAL WEIGHT ARE THE KEY DRIVING FORCES BEHIND THESE LINES.

3L SOFTSHELL

PERFORMANCE SOFTSHELL MIDLAYER JACKETS

This take-it-anywhere jacket provides protection for high-output endeavours on water or land. The wind proof, breathable, water resistant 3-layer construction is perfect for marine specialists looking for enhanced mobility and versatility in their mid-layer. High stretch and form fitting for greater aero efficiency, freedom of movement and easy layering.

A tough, wind resistant and waterproof membrane sheds water, and a light inner fleece adds warmth while wicking away moisture. High breathability ensures you can comfortably layer under a shell when the conditions turn bad. Additional reflective detailing so you can be seen in low light conditions.

FEATURES

ALL ITEMS

- ▶ Micro-grid fleece panels for warmth and insulation. [1](#)
- ▶ 3-layer membrane, quick dry, water repellent, highly breathable. [2](#)
- ▶ Quick dry inner and outer facing. [3](#)
- ▶ Slim fit technical styling; for mid-layer and outer shell use. [4](#)
- ▶ Fitted high collar protects against wind chill. [5](#)
- ▶ Zippered chest pocket and utility pockets. [6](#)
- ▶ Reflective detailing for low light awareness.

▷ WARM AND FUNCTIONAL MID-LAYER FOR USE IN ALL SAILING CONDITIONS OR ON THE STREET. HIGH THERMAL INSULATION WITH LOW WEIGHT ◁

SUPERTHERMAL™ HYDROBASE®

PERFORMANCE BASELAYERS

Warmth starts from the base. At Zhik we are proud to say, that our baselayers stand out from the pack. Superthermal™ Hydrobase® provides amazing moisture wicking properties that carry sweat away from the body fast to keep you dry, perfect for high activity sports.

FEATURES

ALL ITEMS

- ▶ Rapid moisture wicking transfers moisture away from the body to the outer face fast, so you stay dry.
- ▶ High wicking grid tech properties means moisture evaporates fast and the garment dries quickly.
- ▶ Excellent thermal insulation means you stay warm in even the coldest climates.
- ▶ Unique fabric construction regulates your temperature even during high periods of activity.
- ▶ Automatic odour control keeps nasty smells away during long use times.
- ▶ High stretch material.
- ▶ XWR® cuffs to prevent water ingress.
- ▶ Flatlock stitching to prevent chafing.
- ▶ Great baselayer for any sport that demands high activity workloads.
- ▶ Extended length torso in top and high back in pant for additional waist coverage.

TECH INFO

⚙️ BUILT FOR SUPER FAST MOISTURE WICKING

The hydrophilic polyester and hydrophobic polypropylene fibres work together to suck moisture away from the skin to the outside of the garment. Moisture is wicked across the outer hydrophilic polyester fibres allowing it to evaporate easily while the inner hydrophobic polypropylene fibres keep the skin dry even after extended periods of high-sweat activity.

▷ HIGH PERFORMANCE AND FUNCTIONAL SHORTS FOR THE HARSHTEST MARINE ENVIRONMENTS ◁

DECK SHORT & PANT LIGHTWEIGHT, FAST DRYING & FUNCTIONAL BOTTOMS

Built for uninhibited movement and comfort, the water repellent Deck shorts incorporate 4 way stretch fabric, durable materials and plentiful features for the serious racer to a relaxed cruiser.

Incredibly quick drying, the Deck shorts are the perfect versatile short for all marine environments. The high stretch fabric is coated in Zhik's XWR™ Fluorocarbon-free (PFC-free) DWR, ample pockets, high quality zips and reinforced features providing protection against all elements.

The ultimate all-rounder, the Deck pants are crafted with durable, breathable and water-resistant fabric that is perfect for cruising and racing sailing, and equally at home in urban environments. With a tailored fit engineered for movement and comfort, the 4-way high stretch fabric is optimised for effortless movement.

FEATURES

SHORTS

- ▶ Lightweight and quick drying.
- ▶ Robust, high elongation, 4-way stretch water repellent coating.
- ▶ XWR™ Fluorocarbon-free (PFC-free) DWR Water Repellent coating.
- ▶ 9" Inch in-seam with a tapered race fit.
- ▶ Semi-elasticated waistband for an active fit.
- ▶ Zippered water resistant utility pocket.
- ▶ Dual plastic snap lock waist opening.
- ▶ Rear pocket (mens short only).
- ▶ Brushed Tricot pocket, to wick moisture and keep items dry.

PANTS

- ▶ 4-way High stretch woven softshell fabric.
- ▶ XWR® (PFC-free) water repellency.
- ▶ Super-fast drying.
- ▶ Zippered utility pockets.
- ▶ UPF 50+ Protection.
- ▶ Ergonomically tailored for movement.
- ▶ Belt loops and D buckle.
- ▶ Elastic lined waist for additional comfort and support.
- ▶ Rear wallet pocket.

DRYSUITS & WETSUITS

SYNONYMOUS WITH COMFORT, QUALITY AND PERFORMANCE, ZHIK HAS THE LARGEST RANGE OF WETSUITS ON THE MARKET TO HANDLE EVERY CONDITION.

DRYSUIT

FULL BODY PROTECTION FROM THE COLD

Combining technologies from Ocean racing and fast paced inshore sailing, this versatile drysuit is optimised for competitive sailing across a range of disciplines. The result is an agile, lightweight drysuit that avoids bulk while remaining highly durable.

The 3-Layer 10K(mm) / 10K(mvtr) Vecta fabric in combination with streamlined panelling make it both 30% lighter and extremely more breathable than its predecessor. Latex neck and wrist seals create an unrivalled waterproof seal for lasting comfort and water tightness. The main entry utilises a premium German made TIZIP® zipper that is waterproof, airtight, and pressure-resistant.

Anti-abrasion seat, knee, foot sole panelling provide extensive durability for a variety of water sport applications, protecting the garment from abrasion and puncture in those high contact areas.

FEATURES

ALL ITEMS

- ▶ 3-Layer Vecta fabric technology; waterproof, lightweight, breathable TPU membrane designed for dinghy sailing.
- ▶ All seams are taped with critical junctions further reinforced. [4](#)
- ▶ 80/20 Durable Water Repellency (DWR).
- ▶ Latex seals for maximum comfort and durability. [1](#)
- ▶ TiZip Waterproof Zipper for maximum waterproof protection. [5](#)
- ▶ 450D Nylon Oxford reinforced knee, rear, crotch & foot panels to maximise durability. [7](#)
- ▶ Asymmetrically placed zipper for ease of entry/exit and easy relief access. [2](#)
- ▶ Streamline Cargo Pocket design for minimal bulk / maximum storage. [3](#)
- ▶ Protective zipper placket. [6](#)
- ▶ Hi-Vis trims for low light awareness.
- ▶ Internal adjustable elastic suspenders. [8](#)

SUPERWARM® X 3MM THERMAL WETSUITS FOR THE COLDEST CONDITIONS

The Superwarm® X skiff suit features our latest material and wetsuit technologies to produce our most durable, flexible and warmest suit ever. Designed to keep you warm in the coldest environments and conditions. It incorporates 3mm thermal insulating neoprene with our fast-drying Hydrobase® inner fleece lining.

The 3D panel construction moulds to your body for an optimal fit that focuses on increased performance and comfort. Glued, blind stitched and seam taped with high stretch, ultra-thin neoprene tape in critical areas for an extra level of waterproof protection, so you don't lose valuable heat and with 4-way super stretch properties throughout to maximize manoeuvrability.

Our Zhiktex™ II panels on the knees and rear provide amazing abrasion resistance for increased durability and suit longevity, and an easy access leg pocket lets you conveniently stow any small items you use. ZiBand® leg seals provide protection against water gushes and provide a sealed connection with your boots. The Men's suit also features a patented waterproof loo-rip that lets you easily relieve yourself when on the water. Combine it with our Superwarm X Top, Gloves and Socks for full body protection and warmth.

FEATURES

ALL ITEMS

- ▶ 3mm thermal insulating neoprene provides unparalleled warmth for the coldest conditions. [1](#)
- ▶ 4-way super stretch neoprene & nylon throughout for high maneuverability. [2](#)
- ▶ 3D body mapped panels for the most comfortable form fitting fit possible.
- ▶ Fast-drying Hydrobase® inner fleece that is soft, comfortable and wicks moisture. [3](#)
- ▶ Zhiktex™ II superior abrasion resistant panels in the rear and knees provides great durability in high wear areas. [4](#)
- ▶ Glued, blind stitched & seam sealed for complete waterproof protection. [5](#)
- ▶ ZiBand® silicone leg seal banding creates a tight seal to avoid flushes of water. [6](#)
- ▶ Waterproof loo-rip provides patented easy access relief. [Mens suit only] [7](#)
- ▶ Easy access side leg pocket let's you securely stow any small items in a low profile pocket. [8](#)

MICROFLEECE™ ECO X

A 100% NEOPRENE FREE WETSUIT

Taking away traditional non bio-degradable oil based neoprene, we have replaced one of the most toxic materials in clothing with a natural alternative to help us reduce our reliance on petrochemicals. While keeping all the great features of our popular Microfleece wetsuits, maintaining our performance edge.

THE PLASTIC PROBLEM

Ocean plastics are a growing problem. Billions of kilograms of plastic can be found in floating masses that converge in ocean currents, making up about 40 percent of the world's ocean surfaces. These plastics destroy marine life and end up in our food as microplastics.

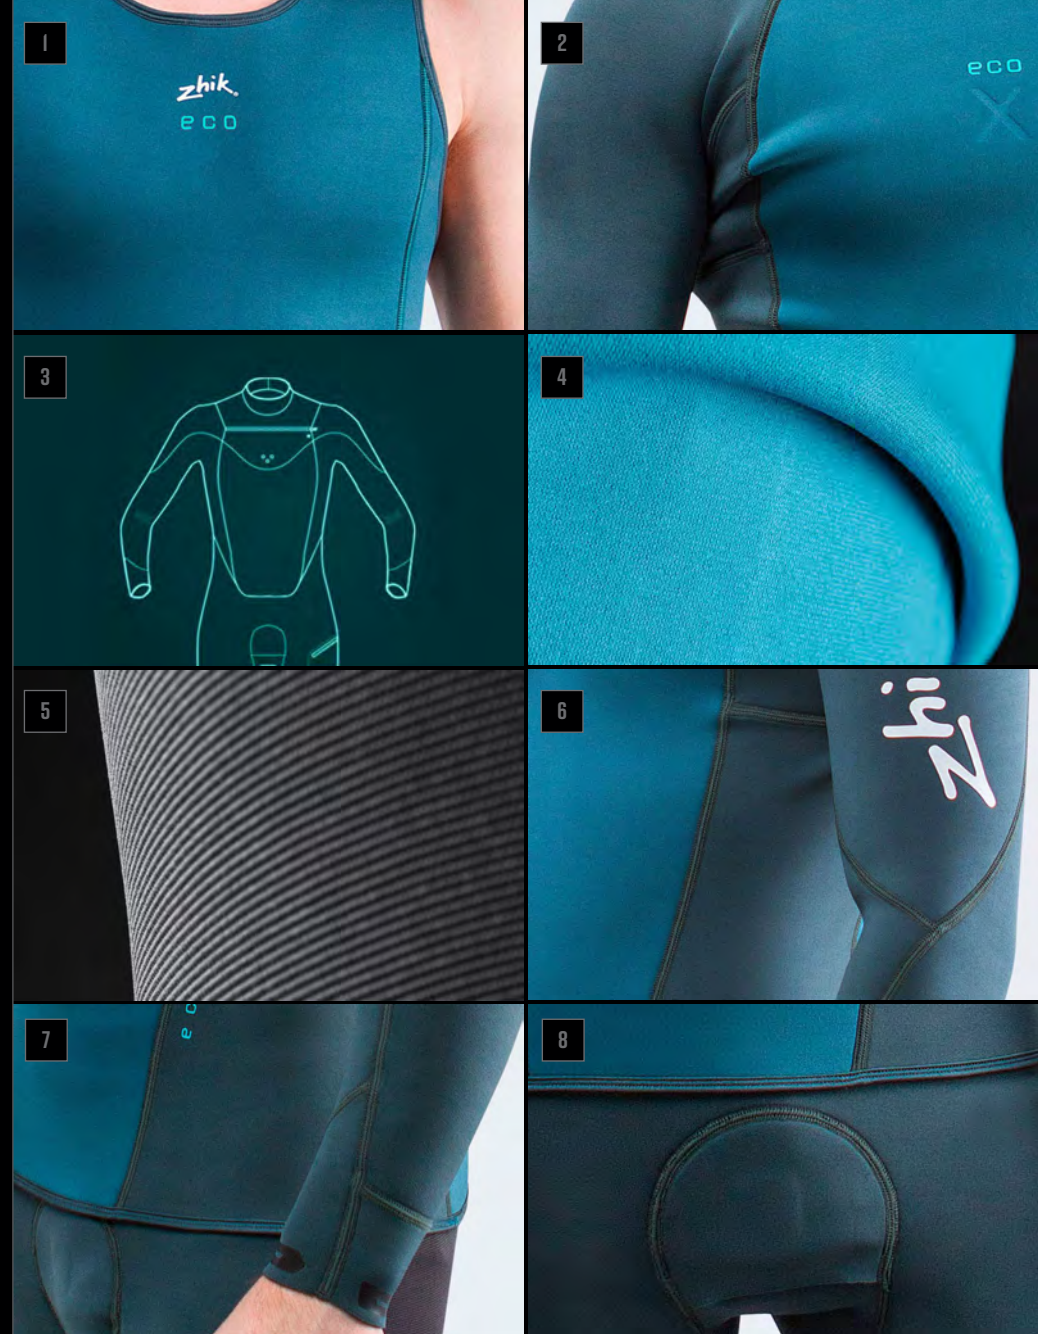

Neoprene has been used in wetsuits for more than 60 years, but it's a non-renewable material with an energy intensive manufacturing process, which produces one of the most toxic forms of clothing that can be made.

At Zhik, our love of the water demands our commitment to help save our oceans from these devastating environmental impacts.

FEATURES

ALL ITEMS

- ▶ A 100% Neoprene Free wetsuit for a more sustainable future. **1**
- ▶ 1mm insulating ecofoam, great for a wide range of conditions. **2**
- ▶ 4-way super stretch for high maneuverability.
- ▶ 3D body mapped panels for the most comfortable form fitting fit possible. **3**
- ▶ Fast-drying inner and recycled outer fabrics that are soft & comfortable. **4**
- ▶ Zhiktex™ II superior abrasion resistant panels in the rear and knees provides great durability in high wear areas. **5**
- ▶ High stretch flatlock stitching that is strong and non-itch. **6**

ECO BENEFITS

BETTER FOR THE WORLD

Our ECO Wetsuit is sourced from sustainable, natural resources and recycled components, making it better for everyone. The natural emulsion used removes nearly all impurities and delivers a stronger, non-sensitizing natural material.

LESS CO² EMISSIONS

Our ECO Wetsuit production produces far less CO² emissions when compared to conventional, non-renewable neoprene suit production—causing less harm to the planet we love and the oceans we enjoy.

RECYCLED FABRICS

We use the highest possible recycled polyester content in our linings, further lessening our use of petroleum and virgin polyester. On average, 64 plastic bottles are recycled and used to create one wetsuit, top and spandex top.

OLA & VIENTO WETSUITS

INSULATED PERFORMANCE & STYLE FOR WAVE & WIND WATER SPORTS

The Viento and Ola Steamers are made for a variety of wave and wind water sports. This range of wetsuits delivers on performance and style, and gives you the freedom of movement and enhanced flexibility where you need it, while protecting you from cold waters and wind chill. The central front zipper entry allows ultimate flexibility through the upper body and the dual layer neck seal design prevents water flushing.

Zhik is renowned for our high-quality dinghy wetsuits and this range of Water sport wetsuits is no different, maintaining this same quality of material and attention to detail. Featuring minimal seam design, unfinished cuffs, and durable Zhiktex® II Knee reinforcement, Glued, blind-stitched and fully seam taped with Zhik's new water-based glue formula, this sealing system prevents any water ingress, is highly flexible and incredibly durable.

The Viento 2mm Springsuit are made for a variety of wave and wind water sports. This range of wetsuits delivers on performance and style, the 2mm neoprene allows freedom of movement and enhanced flexibility. Soft and stretchy 4 needle flatlock stitching ensures durability and high stretch. Designed in collaboration with Zhik's female athletes, the Viento spring suit, features minimal seam design, unfinished cuffs, high stretch flatlock stitching and Zhik's new water-based glue formula.

FEATURES

KOLLITION BLADE TOP & PANT

HIGH RESISTANT OVER GARMENT FOR HIGH SPEED FOILING WATER SPORTS

In collaboration with material specialists Dyneema® , Zhik has constructed a material that can withstand the cut-proof demands of modern-day foiling and high-performance sailing.

In an exclusive Zhik construction, black Dyneema® Diamond Technology Fiber has been 3D knitted with the elastane yarns to create a unique high stretch, cut resistant fabric. Achieving a cut resistance level D in ISO 13997:1999 (Protective clothing — Mechanical properties), the material provides unrivalled cut resistance to hydrofoils while providing great stretch and recovery.

To protect from Impact, Zhik has collaborated with impact armour specialist Rheon™. Born out of NASA and developed for over 15 years at Imperial College, London. The Rheon™ armour range provides the lightest, flexible and dynamic impact protection on the market. Unlike competitors it is highly suited to wet environments, and its perforated design doesn't inhibit breathability or retain water. Integrated in key areas around the body, users can adapt their setup to suit their needs.

Designed as a next to skin stand-alone garment or an over-all kit garment, the Kollition range offers versatility the conditions without sacrificing on performance.

FEATURES

ALL ITEMS

- ▶ Use as standalone item or over the top of your gear.
- ▶ Black Dyneema® Diamond Technology Fiber.
- ▶ Cut resistance level D in ISO 13997:1999.
- ▶ Rheon™ armour range impact resistance.
- ▶ Customisable impact pad configuration.
- ▶ YKK® zippers.

HIKERS

MARKET INNOVATORS AND LEADERS IN HIKING WEAR IS WHERE ZHIK BEGAN. HIKE HARDER FOR LONGER WITH OUR RANGE OF INNOVATIVE SOLUTIONS.

POWERPADS®

CUSTOMISABLE HIKER SYSTEM

In collaboration with carbon fibre experts Carbitex®, a first-of-its-kind lightweight carbon fibre hiking pad has been developed to mould to the users leg utilising asymmetric flex profiles. Paired with this is the new seamless 3D knitted PowerPads® compression sleeve, focussing on comfort, muscle performance and breathability. The powerful combination of these two elements creates a bold new world-first medal winner.

FEATURES

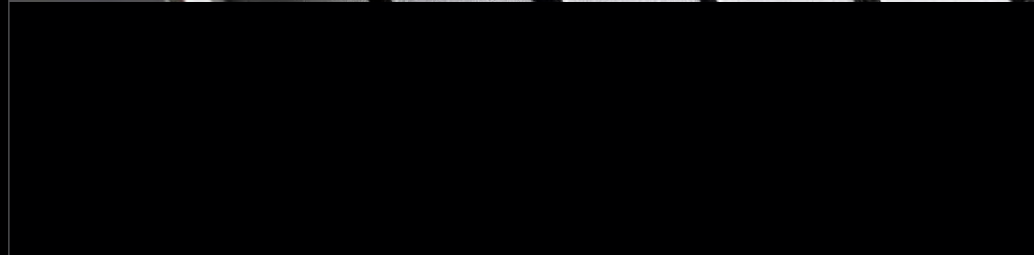

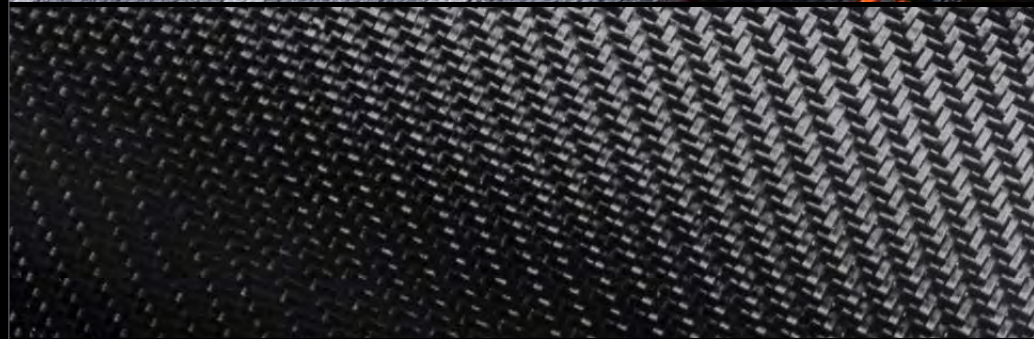

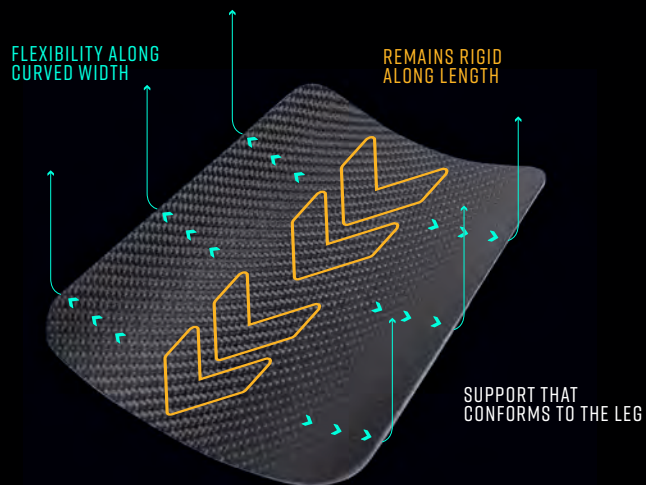

ALL ITEMS

- ▶ High stretch 3D knitted compression sleeve aids in muscle recovery and blood flow when hiking hard.
- ▶ Ultra light carbon fibre hiking pads (using "Carbitex® technology") are asymmetrically flexible. Pads tightly conform to the leg and provide complete rigidity against the loads of hiking.
- ▶ Low profile seamless sleeve design
- ▶ Additional EVA pads give a customisable height allowing adjustability to the conditions.
- ▶ Air-permeable material allows the sleeve to breathe and is therefore cooler under the outer garment.

TECH INFO **carbitex**

⚙️ CARBON FIBRE PAD TECHNOLOGY

The Carbon fibre pad offers significant weight savings over traditional hiker pads, meaning quicker movements around the boat. The dynamic stiffness of the pads give the ultimate in connectivity to the boat, with the asymmetrical flexibility ensure the pads remain contoured to your legs even when hiking.

3D KNITTED SLEEVE

The 3D knitted sleeve gives further weight reductions to more traditional hiker sleeves. The seamless and compressive sleeve holds the hiking pad tightly in place. Made from an air-permeable knit, allowing air to transmit through the sleeve making it cooler to wear. The seamless design is low irritant and the compressive nature can assist in muscle fatigue.

MATERIAL INFO

3D knitted seamless compression sleeve, ultra light carbon fibre hiking pads with asymmetric flex properties and EVA protection pads.

MICROFLEECE™ HIKER

IMM THERMAL HIKING WETSUIT

The traditional hiking suit has been redefined. The revolutionary design encompasses 3D body mapped patterns with 1mm Microfleece dynamic stretch technology. The impact zone of the hiking pads are embedded with fibreglass and are lined with 500 Denier Cordura® to ensure longevity and durability. Zhiktex™ II panelling on the seat and knees combines durability and stretch in high wear areas due to its unique knitted structure.

FEATURES

ALL ITEMS

- ▶ Built-in slim profile pads behind the legs for ergonomic hiking. [1](#)
- ▶ 1mm thermal insulating neoprene provides warmth for a wide range of conditions. [3](#)
- ▶ 4-way dynamic stretch neoprene & nylon throughout the suit for high manoeuvrability.
- ▶ 3D body mapped panels design for sailing movements and the most comfortable fit.
- ▶ Zhiktex™ II superior abrasion resistant panels in the rear and knees provides great durability in high wear areas. [2](#)
- ▶ High stretch flatlock stitching that is strong and non-irritating. [6](#)
- ▶ Adjustable shoulder straps to customise your fit. [5](#)
- ▶ Fast drying inner fleece lining.
- ▶ Removable EVA foam padding allowing you to customise hiking setup. [7](#)

TECH TOPS & BOTTOMS

DESIGNED TO ADD VERSATILITY TO KIT BAGS, ZHIK'S RANGE OF TECH TOPS & BOTTOMS
HAVE ALL WEATHER CONDITIONS COVERED TO MAXIMISE PERFORMANCE.

PERFORMANCE SMOCK WEATHERPROOF SHELL

A performance shell designed for competitive dinghy sailors and sports boats, this smock features Zhik's breathable and waterproof 3 layer Vecta fabric and is seam sealed throughout. An adjustable neck, wrist seals, and waist seal prevent water entry, while a large neck opening allows the garment to be vented and cooled when needed.

This smock has a generous race cut fit for full range of movement, and room to wear a PFD underneath. With minimal hardware and streamlined features this smock was designed to fit close to the body and PFD underneath for minimal aero interference.

FEATURES

ALL ITEMS

- ▶ Utilising 3 Layer breathable and waterproof Vecta™ fabric 10k / 10k. [5](#)
- ▶ High performance and light weight for when conditions turn bad.
- ▶ Super durable DWR coating
- ▶ Can be worn either over or under a PFD.
- ▶ Fully seam taped and critical reinforced waterproofing. [5](#)
- ▶ PU coated wrist seal and neck seals for waterproof protection. [3](#)
- ▶ PU Coated waist seal with pull cord adjustment.
- ▶ Streamlined neck seal closure for quick use and minimal bulk. [1](#) [2](#)
- ▶ Large front chest pocket with Velcro® closure. [6](#) [4](#)

NEO JACKET

HIGHLY VERSATILE 3MM THERMAL JACKET

Made from water and wind-resistant 3mm Superwarm® neoprene, this hooded jacket is perfect for keeping you warm either on land or on the water. This jacket is hugely versatile and styled for performance or casual wear, making a huge difference in windy and cold conditions, In-between races, or simply a heavy down pour.

As a standalone piece or even over a wet wetsuit, the extra insulation from the 3mm soft and flexible neoprene not only keeps you warm and protected from windchill but will stretch and move with you.

Packed full of features, this item is perfect for a variety of water sports.

FEATURES

ALL ITEMS

- ▶ 3mm thermal insulating neoprene provides unparalleled warmth for the coldest conditions. 8
- ▶ 4-way super stretch neoprene. 2
- ▶ Zhiktex™ II Reinforced seat and elbows. 6
- ▶ Form fitting hood with adjustable toggles, for a secure fit in high winds. 3 7
- ▶ External hang loop for kill switch, keys or other accessories.
- ▶ 2x zippered side pockets. 4
- ▶ Double headed main zipper. 5
- ▶ High stretch flatlock stitching that is strong and non-itch.
- ▶ Large hang loop on back of hood, for a quick dry hanging solution.
- ▶ Laser cut thumb loops.

▷ INSULATED WARMTH TO KEEP YOU PROTECTED FROM THE ELEMENTS ◁

SUPERWARM® X 3MM THERMAL TOPS FOR THE COLDEST CONDITIONS

The Superwarm® X Top features our latest material and wetsuit technologies to produce our most durable, flexible and warmest wetsuit top ever. Designed to keep you warm in the coldest environments and conditions. It incorporates 3mm thermal insulating neoprene with our fast-drying Hydrobase® inner fleece lining.

The 3D panel construction moulds to your body for an optimal fit that focuses on increased performance and comfort. Glued, blind stitched and seam taped with a high stretch, ultra-thin neoprene tape in critical areas for an extra level of waterproof protection, so you don't lose valuable heat and with 4-way super stretch properties throughout to maximize manoeuvrability.

ZiBand® arm seals provide protection against water gushes and provide a sealed connection with your gloves. Combine it with our Superwarm X Skiff, Gloves and Socks for full body protection and warmth.

FEATURES

ALL ITEMS

- ▶ 3mm thermal insulating neoprene provides unparalleled warmth for the coldest conditions. ²
- ▶ 4-way super stretch neoprene & nylon throughout for high maneuverability.
- ▶ 3D body mapped panels for the most comfortable form fitting fit possible.
- ▶ Fast-drying Hydrobase® inner fleece that is soft, comfortable and wicks moisture. ³
- ▶ Glued, blind stitched & seam sealed for complete waterproof protection. ⁶
- ▶ ZiBand® silicone wrist seal banding creates a tight seal to avoid flushes of water. ⁵

MICROFLEECE™ PADDLE PANT

THERMAL PROTECTION DESIGNED FOR PADDLERS

Microfleece paddle pants utilise our 1mm dynamic 4 way stretch neoprene in combination with premium nylon-spandex exterior material and super fine microfleece lining for the perfect combination of comfort, flexibility and temperature regulation. Rear lower legs use 5mm drainage holes to quickly breathe and drain water providing maximum mobility and adaptability.

The neoprene in the seat area provides comfort for extended periods of sitting and great stretch for a secured fit. The high rear waist provides exceptional comfort and warmth when in a seated position and friction-free seams to enhance performance and comfort.

Great for all paddling watersports, board watersports, inshore and ocean sailing.

FEATURES

ALL ITEMS

- ▶ 1mm Dynamic stretch Microfleece neoprene.
- ▶ 5mm perforated neoprene lower leg panels for drainage.
- ▶ Ergonomic high back and low front for seated water sports.
- ▶ 3D body panelling with key seam placement and anti-rash flatlock stitching.
- ▶ Low profile waistband with smoothskin inner for a secure and comfortable fit.
- ▶ Fast-drying inner fleece that is soft and comfortable.

DECK OUT IN OUR LARGE RANGE OF WARM HOODIES, CLASSIC POLOS & MUCH MORE.

BROADSIDE COAT MID-LENGTH WARMTH AND PROTECTION

A refined hooded coat for cool, wet days, the Broadside Coat combines highly waterproof, windproof and breathable Vecta® Membranes with Heiq® Xreflex® Radiant Barrier technology and Repreve® recycled insulation for lightweight, low profile warmth and protection.

Designed for the urban landscape, this mid-length coat's lines are clean and sophisticated for any occasion. An insulated removable hood adds flexible protection, while articulated patterns and lower back venting enhance mobility and improve fit. Adjustable side venting openings are included for seated positions.

Ideal® Mag-zip® magnetic attraction zippers are easy to locate and secure. Covered by a large adjustable placket protecting from the weather. Gusseted wrist seals complete the suite of element protection.

FEATURES

ALL ITEMS

- ▶ Medium length coat, Mid height collar. Womens with a tapered fit.
- ▶ Fully taped and waterproof Vecta® membrane.
- ▶ Heiq® XReflex® radiant barrier providing 25% more warmth for the equivalent weight of insulation. 1
- ▶ Repreve® recycled insulation. 2
- ▶ XWR® PFC-free water repellence.
- ▶ Ideal® Magnetized zips for automatic / easy closure. 6
- ▶ Over-sized removable hood. 3
- ▶ Fleece lined hand pockets and pant access pockets. 5
- ▶ Soft gusseted wrists with articulated hems. 7

TECH INFO

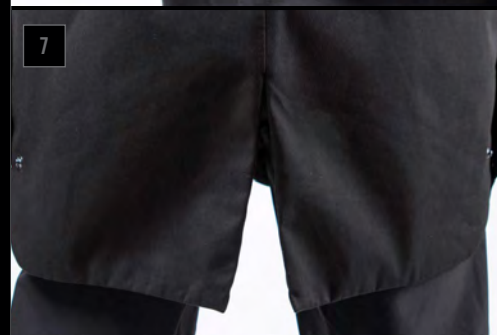

WHAT IS REPREVE®?

Repreve® is the world's number one brand of recycled performance fiber. Using high-quality fibers made from 100% recycled materials, including post-consumer plastic bottles and pre-consumer waste. They are also certified and traceable.

REPREVE

WHAT IS XREFLEX™?

Heiq® XReflex™ is a radiant barrier technology for textiles that improves heat retention. Heiq® XReflex™ allows up to 50% less insulation to be used making clothing and other products thinner, lighter and warmer, providing performance and comfort advantages as well as significant sustainability benefits.

CELL™ INSULATED JACKETS & VESTS

INSULATED & LIGHTWEIGHT MIDLAYER JACKETS & VESTS

Designed to be warm on and off the water, the Cell insulation provides warmth and comfort across a range of sailing disciplines, or just your daily commute. Purpose built as a functional “made for water” mid-layer, its highly breathable construction can be comfortably worn under a shell jacket in very wet conditions, or on its own providing warmth and protection from the elements.

Fused baffling ensures that there is no wind and water ingress from seams. Repreve® synthetic insulation reduces water retention and significantly reduces dry time.

FOOTWEAR

OUR RANGE OF EXTREME GRIP FOOTWEAR WILL KEEP YOU CONFIDENT IN EVEN THE WILDEST WEATHER.

ZKG'S AMPHIBIOUS FOOTWEAR FOR BOAT, BOARD & STREET

Amphibious footwear with an extreme grip rubber sole, 3D Air-mesh and neoprene upper. The ZK Sole™ utilises a unique rubber formula and tread pattern to achieve exceptional levels of grip in the wet, whilst also maintaining excellent levels of durability. Made with a combination of high stretch neoprene and 3D air-mesh the upper is highly supportive, flexible and highly air permeable allowing the foot to breathe and water to drain quickly.

The ZKG® combines excellent flexibility and comfort with outstanding durability and wear. The technical proficiency of the shoes means they are in their element in any marine environment, while the casual, contemporary styling can take them off the water and on to the street.

FEATURES

ALL ITEMS

- ▶ Quick dry and fast drying 3D air mesh. 1
- ▶ Ultra-light and durable materials. 4
- ▶ High grip ZK sole rubber technology. 1
- ▶ Maximum drainage and highly breathability.
- ▶ Classic styling with performance features.
- ▶ Toe and heel pull tabs.
- ▶ Highly flexible upper with a supportive sole and structure. 2
- ▶ Performance features and timeless style.
- ▶ Neoprene for comfortable use around water.

ZK SEABOOT™ 900 TECHNICAL RACING BOTTOMS

Designed for serious offshore and ocean racing, the ZK Seaboot 900 is a 100% waterproof seaboot made from a combination of rubber and insulating neoprene. Delivering amazing support, comfort and performance while remaining agile and responsive to the feel of the boat. Featuring a high grip rubber sole, integrated fast draining gaiter system, comfortable 3D mesh lining and individually tested during production to provide you with the confidence needed when out at sea.

FEATURES

ALL ITEMS

- ▶ 100% Waterproof and individually tested during production for quality.
- ▶ High grip & durable moulded rubber sole for a confident grip on deck in wet conditions. 1
- ▶ Integrated fast draining gaiter prevents water entry in extreme conditions. 2
- ▶ Neoprene and rubber construction keeps your feet dry and warm.
- ▶ Superior support, comfort and performance with reinforced arch and heel support. 3
- ▶ Agile and responsive feel for serious offshore racing.
- ▶ Developed and tested with our teams in the Volvo Ocean Race.
- ▶ 3D Inner mesh lining for added airflow and moisture management. 4

SUPERTHIN BOOTIE

LIGHTWEIGHT AND FLEXIBLE KNITTED BOOT

Made with a durable water-resistant knit upper and ultra-thin and durable rubber sole, the Super-thin bootie is designed to keep you agile, in touch with the vessel and protected while racing on water. The advanced knitted upper is 5x more durable than a traditional neoprene bootie and has been designed to enhance bare foot sensation. With its conformed fit and large drainage sections the boot remains lights and quickly expels any water.

Streamlined in design, the boot is made to slip on and perform, key elasticated sections secure the shoe to the foot, the rubber sole is profiled to provide the perfect balance of protection and agility. Layer with our waterproof or neoprene socks in colder conditions.

FEATURES

ALL ITEMS

- ▶ Waterproof knit upper.
- ▶ Thin rubber sole to enhance bare foot sensation.
- ▶ Siping profiles to enhance grip in the wet.
- ▶ Extended toe cap & raised rubber profiles for support and protection.
- ▶ Integrated drainage points at the arch.
- ▶ Feather light, perforated innersole for drainage.

ZHIKGRIP II® DINGHY BOOTS BOOT & STRAP HIKING PERFORMANCE SYSTEM

The culmination of many years of research and development alongside our team of World Champions, ZhiKrip™ II is a new dinghy boot & strap combination designed to increase hiking performance. A proprietary pattern of studs and interlocks to connect boat and sailor, ZhiKrip™ II is made from a highly durable unique rubber compound. The tapered studs lock in at any angle or position for extreme grip, while still allowing easy movement & adjustment of the boot under the strap. The powerful, interlocking grip allows you to relax your muscles, lock into the boat dynamics, and hike harder for longer while still maintaining full mobility. Boot 360 is our 2mm neoprene lightweight race boot, combining a side lace system with supportive upper construction for lightweight support, comfort and durability.

FEATURES

ALL ITEMS

- ▶ ZhiKrip™ II patented stud locking system. Highly durable, tapered rubber compound studs help you lock in & relax your ankles to improve hiking strength.
- ▶ Able to lock in at any angle or position with our ZhiKrip™ II straps for extreme grip.
- ▶ Custom high grip ZK Sole™ for the ultimate in grip on wet surfaces.
- ▶ Supportive upper construction with 50mm Velcro ankle strap.
- ▶ Side lacing system for a secure fitting boot that you can take off and put on easy.
- ▶ Ergonomic design for a firmer, closer fit with more comfort, and reduced chafing.

HIKING BOOT

- ▶ 4mm neoprene, high cut race boot for maximum support, comfort and durability.
- ▶ Great all rounder hiking boot for most conditions.

LIGHTWEIGHT HIKING BOOT

- ▶ 2mm neoprene, lightweight high cut race boot for flexible support, comfort and durability.
- ▶ Connect with the boats dynamics while remaining supported.

▷ CLASSIC STREAMLINED RACING PFD FOR EASY MOVEMENT AND SAFETY ◁

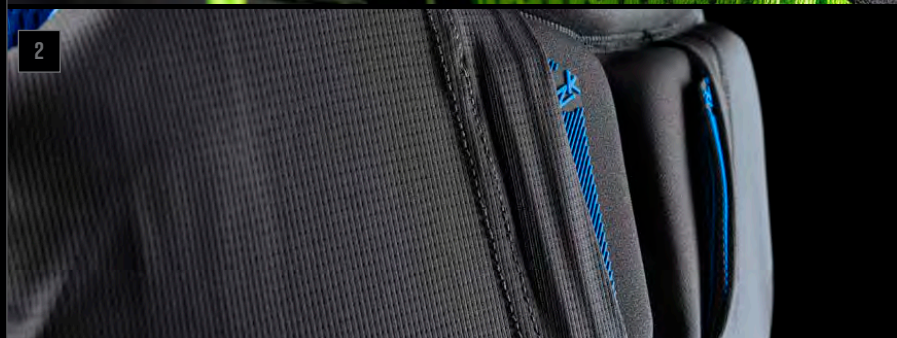

P2 PFD LOW PROFILE PFD

The P2™ PFD is a lightweight and slim buoyancy aid designed to sit close to the body. The ergonomic profile allows freedom of movement with each panel intended to flex with the body with thinner profiles on the back and spine for added manoeuvrability in tight spaces. The front pockets can be used for easy access storage or in conjunction with our Kollition™ Impact pad system to protect you from hard hits. The lightweight pads can be inserted into the front and back at any time. The inner lining of the P2™ PFD is constructed with a high-quality perforated mesh that is soft and provides high airflow and added drainage to keep you cooler and lighter. Non slip grip is also stitched into the hem to stop the PFD riding up. EN ISO 12402-5 Certified.

FEATURES

ALL ITEMS

- ▶ Low profile design to keep you nimble & moving.
- ▶ Ergonomic design with snag reduction for uninhibited movement.
- ▶ Lightweight so you won't feel weighed down.
- ▶ Perforated mesh inner lining designed for softness, airflow & quick drainage. [1](#)
- ▶ Kollition impact padding compatible, giving you the option to add extra protection from hits.
- ▶ Side zipper entry & easy access pockets for quick release and convenience. [2](#) [4](#)
- ▶ Anti-slip grip stitched into the hem to stop the PFD riding up. [3](#)
- ▶ EN ISO 12402-5 Certified.

▷ LIGHTWEIGHT AND SLIM BUOYANCY AID WITH AN ERGONOMIC PROFILE & IMPACT PROTECTION ◁

USCG PFD US COAST GUARD APPROVED PFD

The Zhik USCG PFD is designed with high performance sailing in mind. The smooth racing cut features a large sculpted neck opening and arm holes allowing for maximum freedom of movement. We removed all unnecessary straps and buckles creating clean lines and a close to body fit. Stretch shoulder panels, large front pocket and a simple side entry ensures you can focus on racing. Certified US Coastguard Approved, with only minor length and width design changes to meet the 70N Buoyancy Standard, everything else you loved about our original PFD has remained the same!

▷ CLASSIC STREAMLINED RACING PFD FOR EASY MOVEMENT AND SAFETY ◁

BREATHABLE PFD LIGHTWEIGHT SAFETY

In collaboration with the world's best water athletes, Zhik has created the first truly breathable and light weight PFD. Utilising Zotefoam® a buoyancy foam that is expanded through a unique nitrogen expansion process, which provides a highly durable and lightweight foam. Large negative profiles allow air to flow directly through the PFD onto the body. Ergonomically panelled and ultra-light weight, it almost feels as though you are wearing nothing at all.

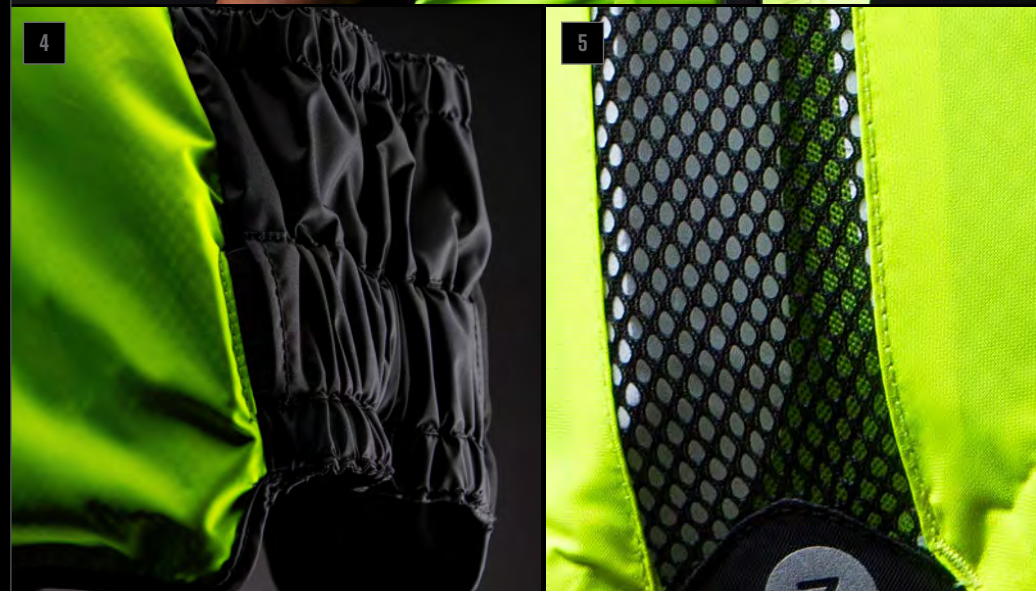

Designed with simplicity and functionality in mind, the simple pullover design, grips lightly to the body with 4 points of elastic compression, It can be easily tightened and adjusted with one hand.

Intended for a wide range of water sports, the breathable PFD is perfectly equipped for your next adventure on the water. Hydration pack compatible for longer adventures, with Hi-vis and reflective elements to keep you visible low light conditions through dusk or dawn.

FEATURES

ALL ITEMS

- ▶ Compatible with hydration Packs, with a rear pocket, drainage and hose locators. 3
- ▶ Hi-Vis Upper Panelling for safety and visibility.
- ▶ Front and Rear airway channels for uninhibited airflow to the core of the body.
- ▶ Reflective Artwork and piping for visibility in low light situations.
- ▶ Central drinking hose attachment. 2
- ▶ Single waist adjustor for one-handed quick adjustments.
- ▶ 2 air permeable mesh pockets and Elastic loops for more security. 1
- ▶ Internal drainage points .
- ▶ Ergonomically shaped with large arm holes to not impede shoulder rotation.
- ▶ ISO 12402-5 certification.

INTERNAL FRONT AND BACK CHANNELS ALLOW FOR MAXIMUM AIRFLOW & BREATHABILITY

T4 TRAPEZE HARNESS

SAFETY, COMFORT & DURABILITY WHEN OUT ON THE WIRE

Designed for minimalism and simplicity the T4 harness uses a nappy seat design with a stretch gusset panel that naturally conforms to your body. Lined with Durable yet lightweight materials, the T4 harness is built to withstand bumps, abrasions, and the stress of high performance trapezing.

With a 5-point attachment system, the T4 allows for quick and easy bar positioning and internally integrated lumbar support enhances the trapezing movement. The crotch panelling design ensures comfort during movement and high loads.

FEATURES

T4 HARNESS

- ▶ Neoprene 4 way stretch gusset and crotch panel.
- ▶ Padded leg linings.
- ▶ Internal fibreglass lumbar support.
- ▶ 600D external seat panel for durability.
- ▶ 400D durable main material.
- ▶ Fast drainage and minimal water retention.
- ▶ Heavy duty Duraflex® hardware.
- ▶ Total weight with spreader bar = 1.1kg.

QUICK RELEASE SAFETY BAR (SOLD SEPARATELY)

A revolution in spreader bar design, the ZQR spreader bar features several industry first material and design features, all while being fully certified (pending) to the safety standards of ISO10862 (Quick release system for trapeze harness). With the versatility to fit into many different harness styles due to its slim profile and many attachment points, the ZQR spreader bar can be retrofitted to your existing Zhik harness or with the T4 and T5 harnesses.

- ▶ Quick release hook mechanism
- ▶ Certified to ISO10862 (Quick release system for trapeze harness). pending
- ▶ Composition material construction
- ▶ Minor incident hook tether
- ▶ 6 Versatile attachment points
- ▶ Patent pending
- ▶ Replacement hooks can be purchased separately.

T5 TRAPEZE HARNESSES

SAFETY, COMFORT & DURABILITY WHEN OUT ON THE WIRE

Offering complete customisation, the T5 harness offers 8 points of adjustments to the fitting and bar position, allowing you to adjust your ride to the finest detail. All adjustments are discreetly covered and stowed with additional covers to avoid snagging.

Lined with Durable yet lightweight materials, the T5 harness is built to withstand bumps, abrasions, and the stress of high performance trapezing. Internally integrated lumbar support enhances the trapezing movement and supports the lower back.

FEATURES

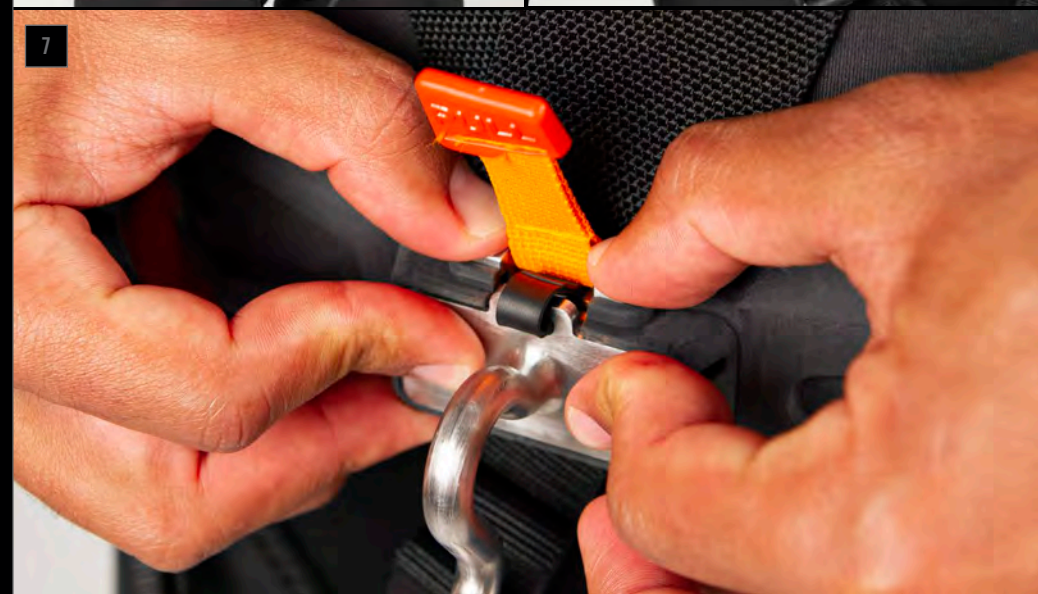

ALL ITEMS

- ▶ 8-point adjustment system.
- ▶ Padded leg strap linings.
- ▶ Internal fibreglass lumbar support.
- ▶ 600D external seat panel for durability.
- ▶ 400D durable main material.
- ▶ Fast drainage and minimal water retention.
- ▶ Heavy duty Duraflex® hardware.
- ▶ Total weight with spreader bar = 1.2kg.

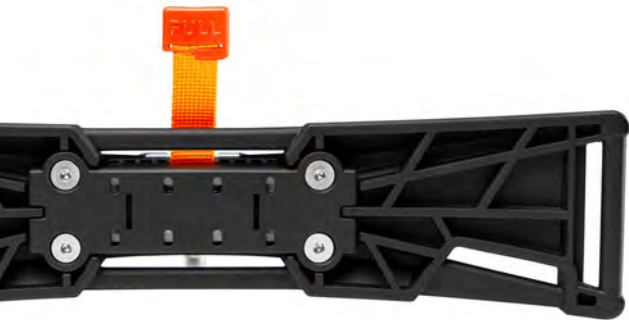

QUICK RELEASE SAFETY BAR (SOLD SEPARATELY)

- ▶ Minor incident hook tether
- ▶ 6 Versatile attachment points
- ▶ Patent pending
- ▶ Replacement hooks can be purchased separately.

PATENT PENDING QUICK RELEASE DESIGN COMPLIANT WITH ISO10862 REGULATIONS

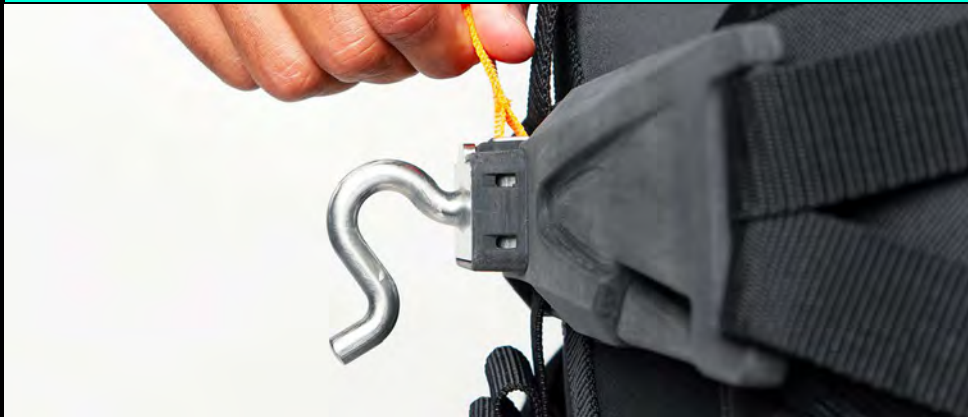

QUICK RELEASE SPREADER BAR

A firm pull of the ejection system releases the hook fitting, an additional tether prevents you losing the hook in the case of minor incidents, with substantial force the tether is broken to completely release bar and hook. With a unique composite material construction, the bar provides high levels of strength without weight.

ACCESSORIES

SLEEK STYLING AND CONSCIOUS FUNCTION ARE AT THE DNA OF THIS COLLECTION.
BUILT TO LAST AND SERVE LOYALLY, THESE ITEMS ARE ALWAYS A FAVOURITE.

BAGS & LUGGAGE

FUNCTIONALITY & DURABILITY

Zhik bags are built tough and designed for use on or around the water. Using strong materials and components throughout with waterproof or repellent properties.

30L BACKPACK

Streamlined to reduce weight without sacrificing any functionality, this is your new everyday backpack. Designed to optimize storage, organise your items small to large and enhance the packing experience, you can access the main compartment by top loading entry or lay flat with the oyster opening. This lightweight backpack is loaded with multiple compartments inside and outside. The additional Molle system allows you to hang and attach items on the outside of the bag. With a breathable, cushioned back panel and adjustable shoulder straps with weight displacement straps the pack optimises comfort wherever possible.

FEATURES

- ▶ Water resistant 210 Denier Fabric, with additional waterproof cover.
- ▶ Duraflex® hardware.
- ▶ Side compression and excessive load straps.
- ▶ Two opening points, oyster opening and top loading entry.
- ▶ Water bottle holder.
- ▶ Loaded with many Internal and external compartments.
- ▶ Internal boot/shoe compartment.
- ▶ Molle hanging system for additional clipping / hanging possibilities.
- ▶ Chest strap for weight displacement.
- ▶ Displacement shoulder straps, relieves the weight off your shoulders.
- ▶ Laptop pocket (up to 17").
- ▶ Buckle secured safety pocket.

65L KIT BAG

Designed for easy access and to keep you gear organised, the 65L split kit bag features deep storage pockets, multiple sections to separate soiled gear, and tie down straps so you can keep all your gear organised. For the ultimate convenience, the large split design means you can easily and quickly access all your gear.

With 3 ways to carry: Sling, Backpack and carry handle, the 65L split duffel never leaves you short on options.

FEATURES

- ▶ Water resistant 420 Denier Fabric.
- ▶ Duraflex® hardware.
- ▶ Deep storage for bulky items.
- ▶ Multiple storage sections.
- ▶ Displacement shoulder straps, relieves the weight off your shoulders.
- ▶ Adjustable Sling.
- ▶ Modular hooks for attachment to other Zhik Modular bags.
- ▶ Internal compression straps.
- ▶ Document sleeves.

FUNCTIONALITY & DURABILITY

Zhik bags are built tough and designed for use on or around the water. Using strong materials and components throughout with waterproof or repellent properties.

45L DRY DUFFEL BACKPACK

The ultimate modular Duffel bag, this bag is designed to work as hard as you. Adaptable in size, submersible and fully waterproof, this pack is designed to carry all your gear on your adventure and to be packed down as small as possible. Compressed to a rectangular shape means your gear will store neatly and won't roll around.

With internal wet and dry compartments, you can easily separate your wet items on your return journey. Additional transparent internal compartments, means your toiletries and liquids are easy to find and kept separate from your gear. With 3 ways to carry: Sling, Backpack and carry handle, the 45L dry bag never leaves you short on options.

FEATURES

- ▶ Water repellent and durable 250 Denier Fabric.
- ▶ Duraflex® hardware.
- ▶ Submersible and fully waterproof.
- ▶ Lightweight and stowable backpack straps.
- ▶ Duffel handles convert to oversized sling, for easy transport.
- ▶ Oversized main entry, to stow bulky items.
- ▶ Internal wet/damp gear storage pocket separates wet and dry gear.
- ▶ Internal transparent cargo pockets, see your items, easily accessible.
- ▶ YKK® Aquaguard® zip.
- ▶ Modular hooks for attachment to other Zhik Modular bags.

110L WHEELIE BAG

The 100L half hard-shell roller designed to accommodate all your gear for any trip. Modular in size, the smart top loading compression straps lets you manipulate the size for short or long trips. Featuring over-sized compartments for gear intensive storage and accented handles/pull points that stand out against the crowd

FEATURES

- ▶ Robust outer fabric.
- ▶ External smart compression straps.
- ▶ Hard shell base and back.
- ▶ Reinforced haul handles.
- ▶ External quick access pocket.
- ▶ Retractable telescopic handle.
- ▶ Internal compression straps.
- ▶ Durable all-terrain wheels.
- ▶ Multiple internal zippered pockets and compartments for organisation.

UV BUFF

- ▶ An essential for any outdoor enthusiast, the UV buff protects your neck and face from Sunburn and Chaffing. The soft stretch material comfortably slides up over your face, ears and neck and is completely adaptable to the conditions. Antimicrobial treatments means you can wear it for extended periods of time with no smell or discomfort.

FEATURES

BREATHABLE NECK GAITER

- ▶ Seamless tube design for chafe free comfort.
- ▶ Textured knitting for increased airflow around the mouth area.
- ▶ Refined hem construction for optimum fit around the face.

FEATURES

SUPERWARM HEADBAND

- ▶ 2mm Neoprene insulation.
- ▶ Water repellent super stretch fabric.
- ▶ Flatlock stitching.
- ▶ Perforated ear hole covers.
- ▶ Fast drying & soft Hydrobase® inner fleece.
