SYC

SPRING/SUMMER 2025

**8beaufort. Hamburg**

**SUSTAINABLE**

*with recycled and upcycled sails*

*Upcycling is the most sustainable way of material use because it reduces a lot of energy and resource. By recycling old sails we decrease waste which pollutes our oceans and seas.*

**HIGH QUALITY**

*due to natural materials*

*We combine upcycling with natural materials such as natural rubber, waxed cotton and chrome-free tanned leather to minimize the pollution that is burdening our planet. This applies to employees who work in the tanneries as well as to our customers, especially those with allergies.*

**EUROPEAN STANDARD**

*eco-fair and certified*

*We use only european leathers, eco cotton and rely on the vegetal tanning process. This reduces CO2 emissions and protects the environment from chemicals.*

**MADE**

*in Portugal*

*In order to be as responsible as possible we only work with reliable and trusted partners. Our shoes are made in Portugal by family owned companies.*

**DESIGNED**

*in Hamburg*

*We get inspired day by day from the beautiful harbour city Hamburg. 8beaufort.Hamburg stands for the sovereignty of those who have found themselves and their style. Pure, modern and with an awareness of sustainable design.*

**COLLABORATION**

*with Secumar*

*We love to cooperate and are convinced only together with our partners we can achieve our sustainability goals.*
