Van der Valk Solar Systems will control and manage its activities to ensure risks to the health, safety and welfare of its employees, customers and the general public are identified and action taken to minimise or eliminate their effects. Adverse effects of operational activities on the environment will be minimised as far as practicable.

Van der Valk Solar Systems recognises our key impacts to be in the areas of:

- Energy use
- Raw material use
- Waste generation
- Transport
- Procurement

We are committed to do and will:

- Promote health, safety and environmental awareness throughout the organisation.
- Provide a safe and healthful workplace and ensure that personnel are properly trained with the appropriate safety and emergency equipment.
- Be an environmentally responsible neighbour in the community where we operate, and correct incidents or conditions that endanger health, safety, or the environment.
- Conserve natural resources by adopting pollution prevention practices. Ex: extending the life of equipment through preventive maintenance scheduling and reworking used equipment.
- Develop and improve operations and technologies to minimize waste, and other pollution, minimize health and safety risks, and dispose of waste safely and responsibly.
- Ensure the responsible use of energy throughout our business, including conserving energy improving energy efficiency, and giving preference to renewable over non renewable energy when feasible .
- Purchase sustainable products wherever feasible.
- Use of environmentally efficient transport.

Van der Valk Solar Systems will periodically review performance and adjust where necessary in an appropriate manner.
