All information at a glance

Present your photovoltaic plant's performance data in a unique way with customized style. The Dashboard delivers a concise presentation of yields, CO_2 savings and performance. As an alternative, we also offer large external Solarfox® displays or the new app - Solar-Log WEB Enerest™ for mobile access.

Solar-Log™ Dashboard

The Dashboard provides customers a dynamic display of all of the important plant information, such as yield, CO_2 savings and performance. The display can be set up by selecting up to any four of the following elements: Current Production, Yield History including self-consumption, Earnings, Weather, Plant Information and Environmental Contribution. The Data Overview module makes it possible to even display the total yield data from several plants in one Dashboard. The Image and Text module allows you to add your own content to the Dashboard. There is the option to display one tile or up to four tiles in the full-screen mode or to display the files as a slide-show.

Solar-Log™ Dashboard – displaying PV plant performance at a glance.
Remote access is possible with the Solar-Log WEB Enerest™ L and XL.
