<b>Foreword.....</b>	<b>xvii</b>
<b>Preface to the 2<sup>nd</sup> Edition.....</b>	<b>xix</b>
<b>Preface to the 3<sup>rd</sup> Edition.....</b>	<b>xxiii</b>
<b>Contributors to 2<sup>nd</sup> Edition.....</b>	<b>xxvii</b>
<b>Contributors to 3<sup>rd</sup> Edition.....</b>	<b>xxxiii</b>
<b>Part I. METHODS.....</b>	<b>1</b>
<b>1. Some Words of Advice from an Old Hand.....</b>	<b>3</b>
<i>Alexander McPherson</i>	
<b>2. Rational Selection of Crystallization Techniques.....</b>	<b>11</b>
<i>Joseph R. Luft and George T. DeTitta</i>	
2.1. Introduction .....	13
2.2. Some Initial Considerations .....	14
2.2.1. Screening.....	15
2.2.2. Optimization.....	15
2.2.3. The Container .....	15
2.2.4. Temperature .....	16
2.3. Choice of Method .....	17
2.3.1. The Phase Diagram .....	18
2.4. Batch Crystallization Methods .....	19
2.4.1. How to Set Up a Batch Experiment .....	22
2.4.2. Batch Methods That Use Oil .....	23
2.5. Vapor-Diffusion Crystallization Methods.....	23
2.5.1. How to Set Up a Vapor-Diffusion Experiment .....	24
2.5.2. Choice of Reservoir Solution .....	25
2.5.3. PEG Solutions and the Vapor Pressure of Water.....	25
2.5.4. Volatile Additives .....	26

2.5.5.	Condensation .....	26
2.5.6.	Methods to Prevent Crystal Adhesion .....	27
2.5.7.	Containers and Supports for Hanging-Drop Experiments.....	27
2.5.8.	Sealants .....	28
2.5.9.	Sitting-Drop Vapor-Diffusion Methods .....	29
2.6.	Important Variables That Affect Kinetics .....	29
2.6.1.	Drop Volume and Shape.....	30
2.6.2.	Chemical Concentrations .....	30
2.6.3.	Different Chemicals Have Different Rates of Equilibration .....	30
2.6.4.	Experiment Drop Volume Ratios.....	31
2.6.5.	Drop-to-Reservoir Volume Ratio.....	31
2.6.6.	Passive Methods to Regulate the Rate of Vapor-Phase Equilibration.....	32
2.7.	Liquid-Diffusion Crystallization Methods .....	32
2.7.1.	Dialysis Liquid Diffusion .....	33
2.7.2.	How to Set Up a Dialysis Experiment .....	33
2.7.3.	Free-Interface Diffusion .....	35
2.7.4.	Counterdiffusion.....	35
2.8.	Practical Considerations for Crystallization Experiments . .	37
2.8.1.	A Chronological Sequence for Hanging-Drop Setups .....	37
2.8.2.	Mixing Experiment Drops.....	38
2.9.	Some Final Thoughts .....	39
2.10.	Summary of Key Points.....	39
	Acknowledgments .....	40
	Supplies .....	40
	References .....	40
<b>3.</b>	<b>Automation for Crystallization: Practical Considerations in Choosing a System .....</b>	<b>47</b>
	<i>Joseph R. Luft and George T. DeTitta</i>	
3.1.	Introduction .....	49
3.2.	Benefits of Automation.....	50
3.2.1.	Reduced Requirements for Protein Sample .....	50
3.2.2.	Replication .....	51
3.2.3.	Unstable Proteins.....	51
3.2.4.	Improved Output .....	51
3.3.	Automation for Liquid Handling of the Stock Solutions.....	51
3.3.1.	Formulation and Delivery of Cocktail Solutions.....	52
3.3.2.	Wash Cycles .....	54
3.4.	Automation for Crystallization .....	54

3.4.1.	Crystallization Method.....	55
3.4.2.	Screening, Optimization, or Both?.....	55
3.4.3.	Retrieving Crystals.....	56
3.4.4.	Dead, Priming, and Experiment Volumes.....	56
3.4.5.	Contact or Noncontact Delivery.....	57
3.4.6.	User Interface.....	57
3.4.7.	Periodic Maintenance and Quality Control.....	57
3.5.	Automation for Imaging the Experimental Outcomes.....	58
3.5.1.	Image Quality.....	58
3.6.	Automation for Information Management.....	59
3.7.	Caveat Emptor (Buyer Beware).....	60
3.7.1.	Excess Capacity.....	60
3.7.2.	Personnel Costs.....	60
3.7.3.	Market Inquiries.....	61
3.8.	Concluding Remarks.....	61
3.9.	Summary of Key Points.....	62
	Acknowledgments.....	62
	References.....	63
<b>4.</b>	<b>Oils for Screening and Optimization.....</b>	<b>65</b>
	<i>Naomi E. Chayen</i>	
4.1.	Introduction.....	67
4.2.	The Rationale for Crystallization under Oil.....	68
4.2.1.	The Microbatch Technique.....	68
4.2.2.	Setting up Crystallization Trials by Microbatch.....	68
4.2.3.	Crystallization of Membrane Proteins in Oil.....	70
4.2.4.	Additional Benefits of Oil.....	70
4.2.5.	Harvesting Microbatch Crystals.....	71
4.3.	The Effect of Different Oils on Microbatch.....	72
4.3.1.	The Use of Different Oils in Screening.....	72
4.3.2.	Limitations of Crystallizing under Oil.....	73
4.4.	Use of Oils in Optimization.....	73
4.4.1.	Control of Nucleation.....	74
4.4.2.	Elimination of Surface Contact Leading to Access Nucleation.....	74
4.5.	Oil for the Miniaturization and Automation of Crystallization in Gels.....	76
4.6.	The Use of Oil for Controlling the Rate of Vapor-Diffusion Trials.....	76
4.7.	Conversion between Vapor Diffusion and Batch/Microbatch.....	77
4.8.	Summary.....	80

<b>5. Crystallization in Gels and Capillaries.....</b>	<b>83</b>
<i>Juan Manuel García-Ruiz</i>	
5.1. Why Use Gels and Capillaries for Protein Crystallization?.....	85
5.2. Is Mass Transport by Diffusion Slower than Mass Transport by Convection?.....	86
5.3. Is a Diffusive Environment Better than a Convective One for Obtaining High-Quality Crystals?.....	87
5.4. Is There Convection in Vapor-Diffusion Experiments?.....	88
5.5. How Can Convection Be Reduced in Crystallization Experiments?.....	88
5.6. Which Gels Should Be Used?.....	89
5.7. Is It Better to Use Gels or Capillaries for Reducing Convection?.....	89
5.8. Can Gels and Capillaries Be Used with Classical Crystallization Techniques?.....	90
5.9. How Does the Counterdiffusion Technique Work?.....	90
5.10. Isn't a Test Tube Too Large for the Small Amount of Proteins Usually Available?.....	91
5.11. Is It Difficult to Fill Such a Small Capillary?.....	92
5.12. What Kind of Capillaries Should Be Used for Counterdiffusion?.....	92
5.13. Is It Possible to Cryoprotect the Crystals in the Capillaries?.....	93
References .....	93
<b>6. Seeding.....</b>	<b>95</b>
<i>Aengus Mac Sweeney and Allan D'Arcy</i>	
6.1. Introduction .....	97
6.2. Streak Seeding.....	99
6.3. Solution Microseeding .....	101
6.3.1. Preparing a Microseed Stock .....	101
6.3.2. Determining the Best Conditions for Solution Microseeding.....	103
6.4. Macroseeding .....	104
6.4.1. Obtaining the Best Possible Seed Crystals.....	105
6.4.2. Determining the Crystal Solubility .....	105
6.4.3. Determining Appropriate Crystal-Growth Conditions .....	106
6.4.4. Washing and Transferring Crystals.....	106
6.4.5. Feeding.....	107
6.5. Seeding When Using Additives.....	107
6.6. Automation and Microseeding.....	108

6.7.	Heterogeneous Seeding .....	108
6.8.	Summary .....	111
6.9.	Summary of Key Points.....	112
	References .....	113
<b>7.</b>	<b>Heavy-Atom Derivatization .....</b>	<b>115</b>
	<i>Zbigniew Dauter and Mirosława Dauter</i>	
7.1.	Why Heavy Atoms?.....	117
7.2.	Precautions .....	119
7.3.	Types of Heavy Atoms .....	120
	7.3.1. Classic Heavy-Metal Compounds .....	120
	7.3.2. Mercurials.....	122
	7.3.3. Lanthanides .....	123
	7.3.4. Metal Clusters .....	123
	7.3.5. Noble Gases.....	124
	7.3.6. Halides.....	124
	7.3.7. Iodination of Aromatics.....	125
	7.3.8. Rapid Soaks.....	126
7.4.	Confirming Derivatization .....	127
	7.4.1. Quick, Low-Resolution Data Collection .....	127
	7.4.2. Mass Spectrometry .....	127
	7.4.3. microPIXE.....	128
	7.4.4. X-Ray Absorption Spectroscopy .....	128
	7.4.5. Native Gel Shift Assay .....	129
7.5.	Radiation Damage .....	129
7.6.	Final Remarks .....	130
	References .....	130
<b>8.</b>	<b>Preparation and Crystallization of Selenomethionine Protein.....</b>	<b>135</b>
	<i>Anna M. Larsson</i>	
8.1.	Why Use Selenomethionine (SeMet)? .....	137
8.2.	When to Choose SeMet .....	138
	8.2.1. Methionine Content.....	138
	8.2.2. Expression Hosts .....	139
	8.2.3. Incorporation Analysis.....	139
8.3.	Other Related Approaches .....	141
	8.3.1. Selenocysteine .....	141
	8.3.2. Sulfur-SAD Phasing .....	141
8.4.	Properties of SeMet.....	142
	8.4.1. How to Avoid Oxidation.....	142
	8.4.2. How to Induce Oxidation and Why .....	142
	8.4.3. Sensitivity to Radiation Damage .....	143
	8.4.4. Data Collection Strategies .....	143

8.4.5.	L- or D,L-Selenomethionine.....	143
8.4.6.	Warning .....	143
8.5.	How to Express SeMet Protein .....	144
8.5.1.	Expression of SeMet-Labeled Protein in <i>Escherichia coli</i> .....	144
8.5.2.	Autoinduced Expression of SeMet-Labeled Protein in <i>Escherichia coli</i> .....	145
8.5.3.	Expression of SeMet-Labeled Protein in <i>Pichia pastoris</i> .....	145
8.6.	How to Purify and Crystallize SeMet Protein.....	146
8.6.1.	Purification .....	146
8.6.2.	Crystallization.....	146
8.7	Summary .....	147
	References .....	148
