

To whom it may concern:

Date: 22 February 2021

Please accept this letter as a testimonial of our experience in regards of projecting, commissioning, installation and operation of the Xsens ultrasonic clamp on meter on various Aker BP sites.

We use these to measure liquid flowrate with good results.

No piping modifications or shutdowns have been required for installation.

As for the measurement uncertainty and performance on both 1. Stage separator and stabilized crude applications, we are very happy with the results.

We will also try to have the meters measuring water cut and density, but its too early to confirm such results yet.

Kind regards / Vennlig hilsen

Børge Olafsen

TA Senior Metering Engineer

A handwritten signature in blue ink, appearing to read "Børge Olafsen".

The AkerBP logo, consisting of a stylized flame icon and the text "AkerBP".
